THE OBJECT OF THIS PUBLICATION

Is to present brief sketches of some of the pioneers of Cattaraugus County—men who have made their mark, and are emphatically a part of the county's history—to the citizens of the present time ; not with the expectation of doing full justice to the characters of those eminent citizens, but as a suggestion, to those suitably qualified, to prepare a full history of the county, with sketches of ALL of the pioneers to whom the TRIBUTE OF GRATITUDE is due. If the sketches here presented fail to accomplish all that could be desired, there is a public satisfaction in preserving the very correct PORTRAITS of those worthy men. For the very satisfactory manner in which the engraved portraits are executed, and the neat typography of these pages, credit is due to Messrs. HOSFORD & Co., of New York City.

The portraits and sketches of Messrs. EDWARDS and FENTON are presented because their Congressional service belongs to Cattaraugus as well as to Chautauque, and because the writer of this, and many others, desired it on grounds of personal friendship.

The Agricultural Society's and town Statistics, and the civil list, as well as the advertisements of honorable business men, will be found of interest.

For a large part of the original matter credit is due to the kindness of Hon. WM. PITT ANGEL and DAVID H. BOLLES, Esq., of Ellicottville; JAMES T. HENRY, Esq., of Olean; L. L. PRATT, Esq., of Fredonia; and JAMES PARKER, Esq., of Frewsburg; and for assistance in collecting statistics, thanks are due to MOSES BEECHER, Esq., and Mr. GEORGE E. NEWCOMB, Deputy County Clerk, of Ellicottville.

TO THE
HONORED OLD PIONEERS,

BENJAMIN CHAMBERLAIN,
FREDERICK S. MARTIN,
ALSON LEAVENWORTH, AND

PETER TEN BROECK,
CHAUNCEY J. FOX,
STALEY N. CLARKE,

WHO HAVE PERFORMED

SETTLERS' DUTIES AND DEFENDED SETTLERS' RIGHTS,

AND EXERCISED

HIGH PUBLIC TRUSTS, CONFIDED TO THEM

BY THE

PEOPLE OF CATTARAUGUS,

WITH ABILITY, INTEGRITY, AND PATRIOTISM,

THIS HUMELE TRIBUTE

IS RESPECTFULLY INSCRIBED.

THE CATTARAUGUS COUNTY AGRICULTURAL & HORTICULTURAL SOCIETY.

LIST OF PREMIUMS

Offered by the Cattaraugus County Agricultural and Horticultural Society, for the Sixteenth Annual Fair, to be held at Little Valley, September 16th, 17th, and 18th, 1857.

THE ANNUAL ADDRESS

Will be delivered at 2 P.M., Friday, the 18th September.

By Hon. JAMES SHELDON, of Buffalo.

THE CLEAN CORNET BAND

Will furnish the Music for the Fair, and give a GRAND CONCERT in the Evening of THURSDAY, the 17th SEPTEMBER.

ADDISON CROWLEY, Esq., Sheriff,
Superintendent of Police.

R U L E S.

I. All property must be entered in the name of the *bona fide* owners, and Grain, Fruit, and Vegetables, Dairy Products, Household and Mechanic Manufactures, must have been raised or made by the exhibitors thereof.

II. STOCK (except horses) must be entered upon the Secretary's books during Wednesday, be on the Fair Grounds by 10 A. M., Thursday, and remain until 3 P. M., Friday; entries of horses and all other property, and for plowing or trial matches, will close at 2 P. M., Thursday; and horses, of all kinds, must be on the Fair Grounds by 9 A. M., Friday, and remain until 3 P.M.; equestrian entries will close at 9 A. M., Friday.

III. Competitors on Dairy Products must give in writing the mode of manufacture; on Crops, the soil, tillage, amount of land, quantity per acre, by weight, according to the New York standard of 1857, cost of raising, &c., verified on oath. The Committee on Crops must be furnished with statements and samples of grain by competitors, on or before the 1st Saturday in December, and the awards will be made at the Annual Meeting.

IV. No Animal or Article can compete but for a single premium.

V. Premiums will not be paid on Animals or Articles of inferior merit, although there may be no competition.

VI. No person shall act as a Judge for awarding premiums, for which he is any way a competitor.

VII. No member, not a resident of this County, shall compete for prizes, (except Diplomas and Transactions,) at any Fair of this Society.

VIII. Any person who shall knowingly violate the regulations of this Society, or who shall seek to obtain a premium by false pretences, or by improper interference with the Judges, shall be excluded from competition.

IX. Hay for Stock on exhibition during the Fair, shall be furnished by the Society *gratis*.

X. DOOR and GATE KEEPERS are prohibited from receiving money for admissions to the Fair Grounds, and must return all tickets received for admissions immediately to the Secretary.

NOTICE TO COMPETITORS.

20 per cent. of premiums, amounting to \$5 to one person, to be paid in books.

25 per cent. of premiums, amounting from \$5 to \$10 to one person, to be paid in books.

33 per cent. of premiums, amounting to over \$10 to one person, to be paid in books.

Persons awarded premiums, to whom the above rule may

apply, to select their books from C. M. Saxton & Co's list of Agricultural Books; any Agricultural paper published in the State of New York, or any Cattaraugus County paper.

Ladies to whom Silver Ware may be awarded, will receive it marked, and of such articles as they may select.

PREMIUMS OTHER THAN MONEY.

In the following list, premiums with 's' prefixed to figures refer to the numbers in C. M. Saxton & Co's list of Agricultural Books, appended to this list. Those marked 'D' are Diplomas; 'Tr.' are Transactions New York State Agricultural Society, or American Institute; 'P' are Patent Office Reports.

NOTICE TO JUDGES.

Judges are requested to attend at their office on the Fair Grounds, promptly at the time specified for each class. If any persons cannot act, they will please notify the Secretary before the first day of the Fair, that the vacancy may be filled.

FIRST DIVISION.

NATHANIEL WALKER, MARSHAL.

Judges of all classes in this division are requested to meet at the Judges' Office at 2 P.M., Thursday, make their examinations, and return their report to the Secretary by 11 A. M., Friday.

Competitors must conform to Rule II. Stock will be arranged under the supervision of the Division Marshal.

B Y - L A W S
OF THE
CATTARAUGUS COUNTY
Agricultural & Horticultural Society.

(As amended to August 10th, 1857.)

P R E A M B L E .

SEC. 1. The style and corporate name of this Society is the "CATTARAUGUS COUNTY AGRICULTURAL AND HORTICULTURAL SOCIETY." It was organized on the 28th day of January, 1856, under authority of an Act of the Legislature of the State of New York, passed April 13, 1855.

Said Act is printed in Volume fourteen, "Transactions of the New York State Agricultural Society, 1854," pages vi. to x.; and

Said Act is hereby declared to be the CONSTITUTION of this Society.

This Society is a reorganization of the "Cattaraugus County Agricultural Society," originally formed on the 11th day of November, 1841.

The objects of this Society are—To improve the condition of Agriculture, Horticulture, Household and Mechanic Arts, within the County of Cattaraugus, by means of Essays, Addresses, Annual Fairs, and Prizes for meritorious productions in each department.

OFFICERS.

§ 2. The officers of this Society are a PRESIDENT, VICE-PRESIDENT, SECRETARY, and TREASURER;

Who shall be elected annually by ballot, and by a majority of the votes cast; and

SIX DIRECTORS,

Two of whom shall be elected annually by ballot, and by a majority of the votes cast, and shall hold their office for three years. The Vice-President, Secretary, and Treasurer shall be residents of the Town where the Fairs are held. The above officers constitute a "BOARD OF MANAGERS."

§ 3. The Board of Managers may appoint a Vice-President in each town in the County, excepting in the town where the Society is located.

§ 4. No person shall be elected to office who is not a member of this Society.

§ 5. Vacancies in office shall be filled only in the modes prescribed in Sections 2 and 3, and at a monthly meeting.

MEMBERSHIP.

§ 6. Membership in this Society begins on the first day of January, and terminates on the thirty-first day of December: *Provided nevertheless*, the officers named in Section 2 shall hold over in the next year until the election of their successors.

§ 7. Any resident of this State may become a MEMBER of this Society by paying *One Dollar* to the Treasurer. Members shall be furnished with tickets entitling them to enter properly to compete for prizes, and admit the owner, lady, and minor children to the Fairs—or a

§ 8. LIFE MEMBER, with all the privileges of annual membership, by paying *Ten Dollars* to the Treasurer at one time, who shall be furnished with a diploma certificate of life membership, and with admission tickets each year, with the owner's permanent number thereon.

§ 9. HONORARY MEMBERSHIP may be conferred upon non-residents of this county, as a mark of respect for services rendered in any department coming within the objects of this Society; and such persons shall be furnished with certificates of the fact, and the President shall annually furnish each one with a " Complimentary Ticket."

§ 10. PUBLISHERS OF NEWSPAPERS in this County who publish the Society's notices, are hereby constituted members of this Society; and the Treasurer shall annually issue to each publisher a MEMBER'S TICKET, and charge the Society therewith.

MISCELLANEOUS FAIR TICKETS.

§ 11. Any member of this Society may enter the Fair grounds with horses and carriage, by buying of the Treasurer a *Twenty-five Cent* CARRIAGE TICKET, which he shall give to the door-keeper before entering.

§ 12. Any Peddler, by buying of the Treasurer a PEDDLER'S TICKET at *Two Dollars*, and an additional ticket for each assistant at *One Dollar*, may enter the Fair grounds and sell goods, except liquors of all kinds of an intoxicating nature, the sale of which is hereby forbidden on the Fair grounds; but he shall be subject to the orders of the President in his location, and shall not sell at auction during the delivery of Addresses or reading Reports.

§ 13. During the Fairs the Treasurer shall sell SINGLE ADMISSION TICKETS at *One Shilling* each.

§ 14. The President may issue COMPLIMENTARY TICKETS at discretion, with the advice of the Board of Managers.

BOARD OF MANAGERS.

§ 15. The authority hereby vested in the Board of Managers is (vide Cons.)

1st. To hold monthly meetings at the same time and place with the Society; and special meetings on the call of the President.

2d. To make all appropriations and investments of the Society's moneys, but only at monthly meetings; provided, if the funds will warrant, they may extend the premiums during the Fairs.

3d. To vote the premiums to be awarded by the Society at the Annual Fairs, and the amount of the Treasurer's bond.

4th. To appoint Adjudging, Revising, and Finance Committees, Marshals, Door-keepers, and Police for the Fairs.

5th. To fix annually the amount of compensation to the Secretary and Treasurer, and the amount to be paid to Policemen at the Fairs.

6th. To establish a Library, to be the property of the Society, by purchase and donations, and make rules for its care, extension, and use; and

7th. To purchase or lease real and personal property, necessary for the use of the Society.

ANNUAL AND MONTHLY MEETINGS.

§ 16. There shall be an ANNUAL MEETING of the Society, to be held in the village of LITTLE VALLEY, on the *first Saturday in January*, at 1 o'clock, P.M., for the election of Officers, and reports of Officers and Committees of the preceding year.

§ 17. MONTHLY MEETINGS of the Society shall be held on the *first Saturday in each month*, (except January,) at 1 o'clock, P. M., in the village of LITTLE VALLEY, for the discussion of questions coming within the "objects" of the Society, and for the transaction of general business.

ANNUAL FAIRS

§ 18. Of this Society shall be held in the village of LITTLE VALLEY, on the *third Wednesday, Thursday and Friday* in the month of September—the programme to be arranged by the Board of Managers; and the following *Regulations* must be strictly adhered to, and should be printed on the Fair Show Bills:

I. All property must be entered in the name of the *bona fide*

owners; and Grain, Fruit, and Vegetables, Dairy Products, Household and Mechanic Manufactures, must have been raised and made by the exhibitors thereof.

II. STOCK (except horses) must be entered upon the Secretary's books during Wednesday, be on the Fair Grounds by 10 A. M., Thursday, and remain until 3 P. M., Friday; entries of horses and all other property, and for plowing or trial matches, will close at 2 P. M., Thursday; and horses, of all kinds, must be on the Fair Grounds by 9 A. M., Friday, and remain until 3 P. M.; equestrian entries will close at 9 A. M., Friday.

III. Competitors on Dairy Products must give in writing the mode of manufacture; on Crops, the soil, tillage, amount of land, quantity per acre, by weight, according to the New York standard of 1857, cost of raising, &c., verified on oath. The Committee on Crops must be furnished with statements and samples of grain by competitors, on or before the 1st Saturday in December, and the awards will be made at the Annual Meeting.

IV. No Animal or Article can compete but for a single premium.

V. Premiums will not be paid on Animals or Articles of inferior merit, although there may be no competition.

VI. No person shall act as a Judge for awarding premiums, for which he is any way a competitor.

VII. No member, not a resident of this County, shall compete for prizes, (except Diplomas and Transactions,) at any Fair of this Society.

VIII. Any person who shall knowingly violate the regulations of the Society, or who shall seek to obtain a premium by false pretences, or by improper interference with the Judges, shall be excluded from competitors.

IX. Hay for STOCK on exhibition during the Fair, shall be furnished by the Society *gratis*.

X. DOOR and GATE KEEPERS are prohibited from receiving money for admissions to the Fair Grounds, and must return all tickets received for admissions immediately to the Secretary.

AN ADJUDGING COMMITTEE

§ 19. Shall be appointed, consisting of five or more persons, to examine and award premiums in each class of property exhibited at the Annual Fairs; three of whom shall form a quorum.

A REVISING COMMITTEE

§ 20. Shall be appointed at the monthly meeting in September, consisting of three members of the Society, (not members of any adjudging committee,) to examine the entries on the Secretary's books and the awards of the several adjudging committees, see that the regulations are complied with by competitors and committees, and report to the Board of Managers during the Fairs; and after the Revising Committee's Reports are accepted, the President shall announce the awards.

A FINANCE COMMITTEE

§ 21. Shall be appointed at the monthly meeting in December, consisting of three members of the Society, to examine the books and vouchers of the Secretary and Treasurer, and report at the Annual Meeting; and also to report the receipts, expenditures, liabilities, resources, and amount and condition of the Society's property.

PRINTING COMMITTEE.

§ 22. The President and Secretary shall procure annually, by contract, the necessary printing for the Society.

ANNUAL REPORTS

§ 23. To the Secretary of the State Agricultural Society, shall be made by the President, Secretary and Treasurer of this Society, immediately after the annual meeting. (Vide § 9 Cons.)

PRESIDENT'S DUTIES.

§ 24. The President shall preside at all meetings of the Society, or of the Board of Managers; see that the Constitu-

tion and By-Laws are complied with: have general supervision of the Fairs: see that the rules are strictly enforced, and that the officers and employees of the Society faithfully perform their duties: draw his warrant on the Treasurer for the payment of all moneys voted by the Board of Managers, and *none other*; and for the delivery of miscellaneous premiums, other than money.

In the absence of the President, the above duties shall be performed by the elective Vice-President.

SECRETARY'S DUTIES.

§ 25. It shall be the duty of the Secretary—

1st. To record the proceedings of each meeting of the Society and Board of Managers, and enter upon the record the names of the members of the Board present at such meetings.

2d. To certify to the Treasurer copies of all resolutions appropriating moneys, and miscellaneous premiums other than money.

3d. To countersign and keep a register of all warrants drawn on the Treasurer by the President, for the payment of the Society's moneys, and miscellaneous premiums other than money.

4th. To carry on the correspondence, issue notices, prepare the premium lists, (voted by the Board of Managers,) and Transactions of the Society and of the Board of Managers, for publication.

5th. To prepare certificates of "Life Membership" and "Honorary Membership," and deliver them to such members; prepare miscellaneous premiums, (other than money,) deliver them to the Treasurer, and take his receipt therefor.

6th. To prepare "Members," "Life Members," "Single Admission," "Carriage," and "Peddler's tickets," keep distinct accounts of each class of tickets, deliver them to the Treasurer, and take his receipt therefor.

7th. To enter, class, and number all property designed for exhibition at the Annual Fairs; when the entries are closed,

prepare duplicate lists of the entries for the use of the several Adjudging Committees: *Provided*, that no entry of property shall be made by the Secretary unless the owner thereof presents a member's ticket.

8th. To act as Librarian for the Society.

9th. The Secretary shall not hold any other office enumerated in §§ 2, 3, 19, 20, and 21.

TREASURER'S DUTIES.

§ 26. It shall be the duty of the Treasurer—

1st. To receive and take charge of all funds, securities, and vouchers of the Society.

2d. To receive from the Secretary registered "Members," "Life Members," and "Peddler's" tickets, "Carriage" and "Single Admission" tickets, which he shall sell at the prices fixed by §§ 7, 8, 11, 12, and 13. He shall keep distinct accounts of each class of tickets, the numbers of the tickets, names and residence of purchasers, and write their names and residence plainly upon the face of the registered tickets, per form § 8.

3d. To pay all orders drawn on him by the President or Vice-President, from moneys appropriated for the purpose named in the order, which orders must be numbered and countersigned by the Secretary; and deliver miscellaneous premiums, other than money, upon like orders; and he is hereby forbid paying moneys of the Society in any other manner.

4th. To keep accounts of the financial operations of the Society; exhibiting clearly and fully the receipts, from the State and all other sources, disbursements, investments, and cash in his hands; make concise statements thereof monthly; have his books and vouchers open to the inspection of the Society, at the stated meetings, and of the Board of Managers, or Finance Committee, on demand.

5th. At the close of the fiscal year, (Friday before the 1st Saturday in January,) he shall make a full report, in writing, of the entire business of his office; and deliver all funds, securities, books and papers of his office to his successor, or to the Board of Managers.

6th. Before entering upon the duties of his office, he shall execute a bond, with two sureties, in the sum of not less than one thousand dollars, to the acceptance of the Board of Managers, which acceptance shall be endorsed on the bond by at least six of their number. The bond shall run to the President and Directors, and to their successors in office, and be kept by the President.

7th. The Treasurer shall not hold any other office enumerated in §§ 2, 3, 19, 20, and 21.

AMENDMENTS.

§ 27. These By-Laws, after the monthly meeting in May, 1856, shall not be suspended, amended, or repealed, except at an annual or monthly meeting of the Society, and by a two-thirds affirmative vote of all the members present, after six months' notice has been submitted in writing by two members.

ACKNOWLEDGMENTS.

The Society take great pleasure in acknowledging from

Col. LEWIS G. MORRIS, Mount Fordham, a copy of "Davy's Devon Herd Book." American Edition.

Col. B. P. JOHNSON, Secretary New York State Agricultural Society, "Transactions N. Y. State Agricultural Society," and Seeds.

The COMMISSIONER OF PATENTS, "Patent Office Reports," and Seeds.

Hon. FRANCIS S. EDWARDS, M.C., a very large number of Public Documents, and Seeds.

Hon. REUBEN E. FENTON, M.C., several valuable Public Documents.

Prof. JOSEPH HENRY, Secretary, for a full set of "Reports of the Smithsonian Institution," to 1855.

LETTERS FROM HONORARY MEMBERS OF THE SOCIETY.

AGRICULTURAL ROOMS, *Albany, April 6th, 1857.*

JOHN MANLEY, Esq., *Sec'y Cattaraugus Ag. Soc.*

It gives me great pleasure to acknowledge the reception of your letter advising me of my election as an honorary member of the Cattaraugus Agricultural and Horticultural Society. Nothing can be more grateful to me than the approbation of the farmers of New York, for whose benefit I have labored for many years, to the best of my ability; and the assurance of approbation by the respected Society of Cattaraugus will ever be cherished by me with the liveliest emotions of gratitude.

Be pleased to communicate to the Society my best thanks for the honor conferred, with an assurance that I shall, to the best of my ability, aid them in the noble work in which they are engaged.

For the kind manner in which you have conveyed the proceedings of the Society, I am greatly obliged.

Very respectfully your ob't serv't,

B. P. JOHNSON.

Mount Fordham, April 22d, 1857.

JOHN MANLEY, *Sec'y, &c., Little Valley.*

DEAR SIR:—Your beautifully gotten up certificate electing me an honorary member of your Society, was duly received, as was also the very complimentary letter accompanying it.

Please present for me, at your next meeting, my sincere acknowledgments; I only hope I may be deserving of a small portion of their high encomiums.

I remain yours, very respectfully,

L. G. MORRIS.

Black Rock, April 7th, 1857.

DEAR SIR:—Your favor of 2d instant, accompanied by a certificate of honorary membership in the Cattaraugus County Agricultural and Horticultural Society, is received, with many thanks for the complimentary terms in which it is presented. I thank you for this undeserved appreciation of my humble merits and labors in a worthy cause.

Be pleased to present my acknowledgments to your Board of Managers, and accept for yourself, personally, my best consideration.

Very truly and respectfully your friend and ob't serv't,

LEWIS F. ALLEN.

JOHN MANLEY, Esq., *Secretary, &c., &c.*

New York, April 6th, 1857.

JOHN MANLEY, Esq., *Secretary.*

DEAR SIR:—Your esteemed favor of the 4th inst., accompanying a certificate constituting me an honorary member of your Society, was duly received.

Please accept for yourself and the Society you so ably represent my warmest thanks for the honor thus conferred, and my assurances of a hearty co-operation in your efforts to promote the interests of Horticulture and Agriculture.

I remain yours, very truly,

C. M. SAXTON.

Fredonia, April 24th, 1857.

JOHN MANLEY, Esq.

MY DEAR SIR:—I have the pleasure of acknowledging through you as Secretary, &c., the receipt of a certificate constituting the undersigned an honorary member of the "Cattaraugus County Agricultural and Horticultural Society."

The favor, in my own mind, possesses a peculiar consequence from the fact that it originated from those who were almost as strangers to each other.

It was as beautiful as it was unexpected, and I shall ever cherish with feelings of more than kindly regard those who have been so earnest in its procurement.

I fear I shall fail in meriting the good wishes of the numerous friends of agricultural science in your county, but such offerings as I may have are at your command.

Please convey to the several officers of your Society my warmest assurances for their health and prosperity, and my grateful thanks for their beautiful compliment.

Your obedient servant,

F. S. EDWARDS.

Frewsburg, July 23d, 1857.

DEAR SIR:—I owe you an apology for so long neglecting to acknowledge your favor of April 8th, informing me of my election as an honorary member of the Cattaraugus County Agricultural and Horticultural Society.

The honor of being esteemed worthy of a place with the members of your Society, would seem to demand an immediate response; and while I have allowed pressing business engagements to occupy my mind to the neglect of this, I beg to assure you that I am not insensible to the honor conferred, nor wanting in grateful appreciation for the flattering terms you are pleased to employ in communicating the intelligence.

I wish I had time to speak of the delights and advantages of that most noble of human pursuits, for the advancement of which your Society is founded. In all ages, among refined and civilized nations, the pursuit of agriculture has constituted a favorite theme for the best

and most exalted minds; and really, a people can furnish no stronger evidence of a high standard of domestic, moral, and intellectual worth than by the display of a general taste for rural occupation. Agriculture may be said to be the foundation impulse of society; "it originates and carries forward the civilization of our race;" therefore, regarded not only as the purest of pleasures and the greatest refreshment that labor can bestow on mind, it is an indication of a Nation's having attained the highest degree of freedom and refinement. Thus it is that the pursuit which stimulates you to associated efforts in its behalf, is worthy of the services, the favor, and the homage of all good men; and believing that Societies formed upon the basis and with the objects of yours, are calculated to advance this great end, I cannot fail to view with pride and congratulation the effort to place your Society and the agricultural interests of your people in the front rank among the counties of the State.

With best wishes for you and the Board of Managers personally, and the cause in which you are engaged, I have the honor to be,

Very respectfully, your obedient servant,

R. E. FENTON.

JOHN MANLEY, Esq., *Secretary, &c.*

DANIEL BUCKLIN, *Treasurer.*

LITTLE VALLEY, *January 2, 1857.*

STANDARD WEIGHT OF GRAIN AND VEGETABLES OF
NEW YORK.

[Chap. 560, Laws of 1857.]

An Act to amend section thirty-six of title two of chapter nineteen of part one of the Revised Statutes, relating to Weights and Measures, as amended by chapter three hundred and seventy-four of the laws of eighteen hundred and thirty-six. [Passed April 15, 1857.]

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Section thirty-six of title two of chapter nineteen of part first of the Revised Statutes, as amended by chapter three hundred and seventy-four of the laws of eighteen hundred and thirty-six, is hereby amended so as to read as follows:

§ 15. Whenever wheat, rye, Indian corn, buckwheat, barley, oats, beans, peas, clover seed, timothy seed, flax seed, or potatoes shall be sold by the bushel, and no special agreement shall be made by the parties as to the mode of measuring, the bushel shall consist of

62	pounds of Beans,
60	“ Wheat, Peas, Clover seed, or Potatoes,
58	“ Indian Corn,
56	“ Rye,
55	“ Flax Seed,
48	“ Buckwheat, or Barley,
44	“ Timothy Seed, and
32	“ Oats.

THE AMERICAN ELK DOMESTICATED.

[From the Transactions of the State Agricultural Society.]

Mr. LORENZO STRATTON, of Little Valley, has been experimenting for a few years past, with a view to test the practicability of domesticating Elk; and for this purpose enclosed a tract of very hilly land, well wooded, for ranging and browsing. His animals are so amiable that he has driven several of them to the three last Fairs of Cattaraugus County, without difficulty, where they attracted great attention. In answer to a note of inquiry, Mr. STRATTON has kindly furnished the following interesting paper, and it is hoped that the suggestions it contains may attract attention. The success attending Mr. STRATTON's experiments thus far, certainly argues well for more extended efforts.

(FROM CATTARAUGUS COUNTY REPORT.)

Mr. JOHN MANLEY :

DEAR SIR—I have received your letter, asking, as Secretary of the Cattaraugus County Agricultural and Horticultu-

ral Society, some statement in relation to my experience in domesticating the American Elk, or "Great Wapiti" Deer.

To commence at the beginning, I came in possession of my first pair in the spring of 1853, in the course of trade with the agents of a Western Fur Company, who had purchased the fawns of a tribe of Indians on some of the head branches of the Missouri River. At the time of my purchase I had no other object in view than the hope of reproducing a few, and having the pleasure of seeing a herd of these magnificent foresters quietly feeding on the identical grounds where nature had once planted and provided for their ancestors, in untold numbers. In view of their rapid decrease on the approach of civilization, and the threatening prospect of exterminating the entire race, I have deemed it something more than idle curiosity to preserve from destruction some of the characteristics of our American forests. It is not yet fifty years since the Elk were so numerous in this county that the Indian or pioneer trapper, after finishing his store of provisions for his breakfast, might with confidence expect to sup on a choice cut from the surloin of an Elk; and the Indian is now living who can boast of killing three Elk in one day, within a hundred rods of where you have held your three last Agricultural Fairs; and another Indian informs me that he once killed an antlered buck within rifle shot of the Cattaraugus Depot, and, as near as can now be ascertained, the famous forester fell on the precise ground where since has been reared the elegant and substantial residence of Judge Leavenworth. But what a change has been wrought since? It has now been some years since the last track of the Elk has been seen in the fastnesses of the Pennsylvania woods. It is said there may yet a few be found on the western shore of Lake Huron, in the vicinity of the Au Sable River. Where next may we find them? Within some six or seven years, herds of hundreds, and perhaps thousands, were to be found in the vicinity of St. Paul, Minnesota; but now we might as well look for them in Orange County. Their western range being large prairies, skirted with narrow strips and small patches of woodland, they were easily slaughtered

and driven off by the first settlers; and at the present time they are only to be found by at least a week's journey beyond the lines of civilization. The first thing that called my attention to this matter, as likely to afford any pecuniary profit, was a document laid before the Senate by Wm. R. King, Vice-President of the United States, and also President of the Senate, by Professor S. F. Baird, of the Smithsonian Institute, at the instance of Thomas Ewbanks, Commissioner of Patents. The substance of which document was a call on the Government for means to procure, domesticate, and re-stock certain portions of land in the States of New York, Pennsylvania, and other States which were nearly or quite worthless for agricultural purposes, but would still be a most inviting place for this purpose--citing as sufficient proof of its practicability, that formerly this country produced Elk as naturally as it does now *brush* and *white rabbits*.

Now, as I had a pair of Elk and a quantity of this description of land at the time my attention was called to this view of the subject, it readily occurred to me that I might indulge my fancy in this business, with a fair prospect of remuneration. I therefore set about it in a business way, by purchasing at different times three more Elk, and preparing them a pasture of one hundred and twenty-five acres of well-fenced woodland, in which they have now been for three years, without any additional expense worth naming, beyond a visit to the park some three or four times a week, at which times I always carry a pocket of corn, oats, or a handful of clover heads, in summer, all of which they are very fond: and in this way I keep on excellent terms with them. My success in domesticating them by this sort of treatment has been quite satisfactory; instead of scampering away like wild animals, when I approach them, they crowd around me like so many pets. My original number, of five purchased Elk, have increased to ten, with a prospect of an additional increase of four next spring. During the winter, and in time of deep snows, they gather into a thicket of brush, (which embraces about one-half these grounds,) which they trim with great ap-

parent relish; and notwithstanding the deep snows and severe winter of 1855-6, they remained in high order, with no other resources than the staddle timber or brush, which they laid waste by the acre. The enclosure I have for them would be quite sufficient to sustain from fifty to sixty Elk until they have destroyed the brush, at which time their pasture would have to be extended over new territory, or trees be cut in winter for them to browse. Now, in view of the character and price of large quantities of land in this country, and also of the fact that these mountain ranges were formerly the natural home of the Elk, and their perfect susceptibility of domestication, I deem it an enterprise of the first importance that portions of these lands should be re-stocked with their original denizens; and not only to the naturalist, the man of science, but to those wishing a profitable investment, it holds out every inducement. When we consider the amount of lands in this country only fitted for such purposes, I do not hesitate to say that it might be made a business of vast importance. While the world is being ransacked to obtain rare and foreign animals, which may never be acclimated to this country, and whose utility is rather questionable, if they should be, the Elk, with all its claims to our attention, with scarcely an effort to domesticate, is rapidly disappearing from the land. When we consider the short space of time (say 50 years) since the Elk ranged the entire country between this and the Mississippi River, it is a fair estimate, with the increased facilities of travel and emigration, and what is being done in the Territories of Utah, Nebraska, and Dacotah, that within twenty-five years the race will be entirely extinct, unless proper means is resorted to for their domestication—not a very pleasant prospect, when our forest might produce, at comparatively small expense, an abundance of venison, the quality of which is the very crowning dish of the epicure, adding materially to the wealth and the importance of the country.

The Elk, although having many characteristics of the Deer, has yet a strong individuality of his own: it is not particularly timid, or liable to stampede or sudden fright like the Deer,

but depends more upon prowess than flight, in case of danger. The Elk is not so restless in disposition, and therefore more disposed to fatten. I have been much surprised to see my whole number (ten) in higher condition than any ten animals that could be selected among all the domestic cattle on the farm, which had the advantage of good pastures.

The weight of a full-grown buck is from five to six hundred pounds; that of a Doe, from four to five hundred. They mature at about four years of age. The bucks only, have antlers, which they shed yearly, like the Deer. The engraving I send you does not give very flattering portraits, but the best I could get executed in the country.

Yours respectfully,

LORENZO STRATTON.

Little Valley, N. Y., February, 1857.

BIOGRAPHIES.

BENJAMIN CHAMBERLAIN.

It can hardly be expected that, in the brief limit allowed for that purpose, anything like justice can be done to the character and history of one of the most remarkable men of Western New York. Yet in the general results of his life there is so much of interest and lessons of such practical value in his experience and example, that no one can contemplate his history without profit, or fail to draw encouragement from the evidence he has furnished of what may be accomplished by energy and perseverance, even under the most discouraging circumstances.

BENJAMIN CHAMBERLAIN was born July 31, 1791, in the town of Mount Vernon, Kennebec County, in the State of Maine, where he resided until he was ten years of age, when his father and his family removed to the County of Alleghany, in this State, and settled in the town of Belfast, on the Genesee River. At that time the whole of Western New York was little better than a wilderness, and the rewards of industry and enterprise here were only to be reached through scenes of toil and trials and privations that often tried the sternest energies of those who possessed the courage to encounter them. The family of Judge CHAMBERLAIN were in humble life. Their lot was cast amongst the millions whose fate it is to toil, endure, and suffer, and to win their way to such position of prosperity or distinction as it may be their fortune to attain, unaided and alone.

At that early period, the educational advantages of this portion of the state were extremely limited. Schools of any description were scarcely known, and the instruction of children was mostly confined to

such information as the parents were able to impart, or as might be secured by their own unaided efforts. The subject of our sketch had none of the advantages that are placed within the reach of the youth of the present day, and he was compelled by a stern necessity, not only by a want of opportunity, but a want of means, to set out in the journey of life without any of the aids derived from a proper training in the schools.

In March, 1807, when only sixteen years of age, CHAMBERLAIN left his home to commence a career seldom equalled in its leading features, among the self-made men of the country. Without money, or clothes, except such as were upon his back, barefoot and alone, he went to Olean, in this county, in search of employment. This place was then known as the village of Hamilton, and was for a long time, and until the opening of the Erie Canal, known all over the State and New England, and famous as the point where emigrants to the Western States of Ohio, Indiana, and Illinois began their long journey down the Alleghany and Ohio Rivers, upon "rafts," and in "flat boats," and such other craft as were accustomed to navigate those waters.

Here he commenced work for Major ADAM HOOPS, the founder of the village, and labored diligently, by the month, for five years. His employment was mostly in saw-mills, and at the various branches of lumbering, which was at that time the principal business of the country. The five years here spent were unvaried by any incident worth relating, yet it was the school in which his mind was formed, and the scene where his business character was laid. This time of toil was productive of profit, small, it is true, but sufficient for his wants, and still more of discipline and preparation. As he increased in years and grew in strength, his intellect expanded and his powers enlarged, until the position of a laborer in a saw-mill, at wages by the month, could no longer satisfy his ambition or afford a sufficient field for his energies and active capacity for business, and he began to look abroad for a wider avenue to usefulness and wealth. Chances for business adventures, even for men of capital, in a wilderness country as Cattaraugus then was, were extremely limited and rarely to be found. The idea formed by CHAMBERLAIN, of "setting up in business," without capital, without friends or influence, may be regarded as displaying more of courage and determination than sagacity or discretion. But he possessed in his own mind and energies, in his stout heart and iron will, a "capital" that not only supplied the want of money and friends, but

a fund that was soon found equal to the emergency. In company with a Mr. M'KAY, now deceased, he erected a saw-mill in Great Valley, and engaged in the business of lumbering, which he has steadily followed to the present time. After considerable exertion, the mill was completed and put in successful operation, and about one hundred thousand feet of boards manufactured, ready for the market. At this point, the fortitude and courage of the parties were severely tried by a terrible calamity. The mill and all the sawed lumber took fire, and were entirely consumed. CHAMBERLAIN lost all he had in the world, and was not only left without a dollar, but not entirely free from debts contracted in his business; and M'KAY was found to be utterly insolvent. A less hopeful and determined man would have yielded to a misfortune so overwhelming; and for a time even his iron energy seemed paralyzed. At this critical moment he received unexpected encouragement and valuable aid in the warm affection and calm judgment of his wife. With a philosophy that no calamity could shake, and a faith in the future that nothing could disturb, she counselled her husband to a renewed effort to retrieve his fortunes. She called his attention to the fact that they were still young, blessed with health and vigor, and that with industry, perseverance, and economy they could overcome the loss they had sustained, and yet secure a competence. The resolution was soon formed to rebuild the mill, and CHAMBERLAIN set to work alone, to procure the means. At this time there was but one merchant doing business in the county. This was Capt. HENRY DE FOREST, who was trading at Olean. To him CHAMBERLAIN applied for aid, and told him the story of his loss, and laid before him his plans for the future. Capt. DE FOREST readily granted him a credit of \$1,000 in goods, which enabled him to reconstruct his mill, and again embark in business. We have occasion to know that CHAMBERLAIN attributes his successful commencement in the world to Capt. DE FOREST, and to this day regards him in grateful remembrance as the founder of his fortunes.

At this period, the business of the county was carried on under circumstances of great disadvantage. The prices of provisions and family goods were enormously high, and the articles difficult to be procured. Flour was \$20 per barrel, pork \$40, coarse satinet \$2.75 per yard, cotton shirting five shillings a yard, commonly known as "hum hum," and coarse brogans from \$2.50 to \$3 a pair.

It was under such circumstances that CHAMBERLAIN's second effort

was begun, and the obstacles which were overcome may be better understood when it is known that all the iron-work for the mill had to be transported from Pittsburgh, in canoes, on the Alleghany River; and pork and flour were obtained in the same laborious and expensive manner.

From the period last mentioned, Mr. CHAMBERLAIN has been largely engaged in lumbering on the Alleghany, and for thirty-five years has enjoyed a degree of prosperity and an unbounded credit, seldom secured by any individual. He often makes grateful mention of his friend, the Hon. ALLEN AYRAULT, of Geneseo, who early accommodated him with loans, as President of the Livingston County Bank, and never in any emergency refused to discount his paper. Throughout the entire field of his operations, during the long period referred to, his bond has been regarded entirely safe, and his draft honored at sight.

In conducting his business, his office was not alone that of a mere overseer. His hands were alike familiar with the axe and the oar, and during the earlier years of his career he labored as constantly and as hard as any workman in his employ. In his operations he received essential aid from his wife, who is no less remarkable in her sphere than he in his. While absent at market with his lumber, she directed the management at home—employed hands, prepared and dispatched the boards at every freshet, and maintained the same vigilant and successful care over the operations of business as though it were her proper place in life. To her should be given a large share of credit for the achievements of her husband, who now counts his wealth by hundreds of thousands, the result of their joint industry, intelligence, and perseverance.

Aside from business transactions, Mr. CHAMBERLAIN is largely identified with the political history of the county. The Act erecting the county into separate territory, taken from the old County of Genesee, was passed March 11, 1808, but it was not politically organized until March 18, 1817, with the following gentlemen as county officers: TIMOTHY H. PORTER, *First Judge*; SANDS BOUTON, *County Clerk*; ISRAEL CURTIS, *Sheriff*; and JEREMY WOOSTER, *Surrogate*. Under the old Council of Appointment, Mr. CHAMBERLAIN held the office of Sheriff, from February 17, 1820, to June 1, of the same year, and from February 12, 1821, to December 31, 1822. By the Constitution of 1821, the office was made elective by the people, and at the second election, in November, 1825, he was chosen Sheriff, and served until

December, 1828. Having previously served as Associate Judge of the Court of Common Pleas of the county, with HON. ALSON LEAVENWORTH as First Judge, Mr. CHAMBERLAIN was appointed by the late Gov. MARCY, First Judge of the Common Pleas, of Cattaraugus County, Feb. 15, 1833; reappointed by Gov. MARCY, in 1838, for a second term of five years, and again appointed for a third term by Gov. BOECK, in 1843, and served until June, 1847, when he was succeeded by the Hon. RENSSELAER LAMB, under the new Constitution of 1846. Although Judge CHAMBERLAIN had no advantages of education, nor the benefit of legal training, he possessed an unsurpassed practical business capacity. To an intuitive knowledge of the motives and character of men, he united a sagacity that penetrated clearly the forensic myths of the bar, enabling him to dispel the legal fogs, sift conflicting evidence, and present every case in a plain, intelligible manner to the jury. His "charges" to juries are remembered as models of directness, brevity, and perspicuity; and although not bred a lawyer, while on the bench it was often remarked that "he had it the natural way."

In political affinities, Judge CHAMBERLAIN has acted with the Democratic Party. Although never a noisy partisan, he has possessed the confidence of his party, and frequently been selected as their standard bearer. In 1852, he was elected and served as a member of the Electoral College of New York, which cast the Presidential vote of the State for FRANKLIN PIERCE and WILLIAM R. KING.

Judge CHAMBERLAIN has participated in all the efforts at improvement of a public character in the county, and manifested a substantial interest in schools, contributing liberally towards the establishment of the *Randolph Academy*, which has attained a just popularity under the careful management of the Trustees, of which Board Judge CHAMBERLAIN has been the President from the beginning. The munificent provisions for endowing a professorship in a neighboring college, which it is understood he contemplates, attest his interest in the cause of education, and is an honor to his liberality.

Physically, possessing an "iron constitution," united to large mental capacity and enduring energy, Judge CHAMBERLAIN is one of the remarkable men of Western New York. He at present resides at East Randolph, where he enjoys the comforts of an elegant home, and is ever ready to welcome his friends with a warm-hearted and generous hospitality, which he and his amiable wife know so well how to dis-

Peter PonBracek

Published by John Manley, Little Valley, NY 1857

pense. Though now sixty-six years of age, he is one of the most active business men in the county. His business extends to farming, lumbering, dealing in lands, mercantile and banking operations, all of which come constantly under his careful eye and personal supervision. He makes weekly visits to Cuba, sixty-seven miles from his home, to give direction to the officers of the CUBA BANK, of which he is President, and the principal stockholder.

The great element in Judge CHAMBERLAIN'S success has been an iron will and myielding perseverance. He commenced the great battle of life resolved to conquer and overcome, and the results he has accomplished over the opposing forces that beset his early efforts, show how wisely and how well he has maintained the contest. In his history, no man can fail to find encouragement. The most formidable obstacles yield to the force of a steady determination, and often when least expected the resolute heart finds illustrated, in its own experience, the beautiful Irish aphorism, that "*there is a silver lining to every cloud.*"

PETER TEN BROECK.

PETER TEN BROECK, as his name imports, is of German extraction, and was born in Somerset County, New Jersey, on the 1st day of May, 1793. He was the eldest of five sons, and the second of a family of ten children. In 1797 his father, REOLOFF TEN BROECK, a farmer in moderate circumstances, removed with his family to Otsego County in this State. The country was thinly settled at that time, and schools and school-houses "few and far between." Up to the age of 13, young PETER had not seen the inside of a school-room, and the little education he possessed had been imparted to him by his mother. The nearest school was three miles distant, and there he spent three months in the winter of 1806, acquiring a knowledge of figures. He had learned to read and write tolerably well at home, and when he came to enter the public school he readily acquired a knowledge of "Addition, Multiplication, and Division." This was all the "schooling" young TEN BROECK could boast until he attained his majority. When he became of age he felt his need of a better knowledge of grammar and

other rudiments of an English education. To gratify this ambition, so unusual for one of his age, he entered an academic institution then located at Sangersfield, in Oneida County. He applied himself diligently to his studies to the close of the term, which was just six weeks; and this, to use his own language, "completed his education."

In 1816, at the age of twenty-three, Mr. TEN BROECK left his father's house to seek his fortune in the "far West." His outfit was scanty, consisting of a single change of clothing and barely ready money enough to defray his traveling expenses. With his pack on his back, he traveled alone and on foot—for railroads, canals, and stage-coaches were scarce in those days—the entire distance from his father's house to Erie, Pennsylvania, reaching that borough the latter part of May. He had examined with considerable care the country over which he had passed, and after a rest at Erie of three or four days he set out on his return. Taking his route "across the country," through Mayville, Chautauque County, to Connewango, Little Valley, and Ellicottville, he reached a small settlement on the Ischna Creek, now known as the village of Franklinville, on the 6th day of June, 1816. Spending a day or two hereabouts for rest, he renewed his journey homeward, where he arrived in the early part of July.

The balance of the summer of 1816, or until October following, was spent at his father's house. In October Mr. TEN BROECK, accompanied by his younger brother CORNELIUS, (who died in Farmersville in 1843,) and RICHARD TOZER, again started, on foot, to seek a home in the West. They carried their own provisions, which were replenished by purchase from farmers and others living along their route. They were nearly a month on the road, reaching Farmersville the latter part of October. As they were on a "voyage of discovery," they traveled over what are now the towns of Farmersville, Franklinville, Ellicottville, Little Valley, Great Valley, and a part of Napoli and Connewango. They saw nothing particularly attractive after they left the valley of the Ischna, and finally resolved to return to Franklinville or Farmersville, and take up farms in that vicinity. Soon after their return to Franklinville Mr. TEN BROECK was deputed by his associates to go to the Land Office at Batavia, and contract with the Holland Land Company for three farms. This he did, contracting for 600 acres; 200 for himself, 200 for his brother CORNELIUS, and 200 for Mr. TOZER. CORNELIUS and TOZER accompanied him "out" as far as the Genesee River, where they worked by the day during Mr. TEN BROECK'S

absence. On his return they had earned money enough to purchase a month's supply of flour, beef, and butter. The flour was baked into bread, and the "supplies" divided into three equal parts, and each taking his "sack on his shoulder," the three again sought their "wilderness home." Arriving there in due time, they set about staking and "blazing" out their lots. The winter coming on, and no preparations having been made for a stay through it, they returned to Otsego County. In February following the three returned again, their little company increased by the addition of Capt. PELEG ROBBINS and LEVI PEET, Esq., both of whom are now prominent and wealthy citizens of Farmersville.

Before leaving the fall previous, the three "new settlers" had hewn and put together a small log house. They could find no boards or mill to saw them nearer than ten miles, so they left it till spring, minus a roof. The first business of the party on their return was to procure the necessary covering for their "log mansion." The first two nights were spent in the enclosure, which was partially covered with canvass. This illy protected the stout-hearted pioneers from the storm which began the evening they reached there, and continued for thirty-six hours. Snow fell to the depth of three feet, but notwithstanding this, as their necessities were great, Mr. TEN BROECK and Mr. TOZER with an ox team made their way through the woods and snow, to McCLURE's saw-mill, ten miles distant, for boards to cover their only log house, which was to serve as an abiding place for the whole party. They were obtained, the house finished as well as it could be, and soon the curling smoke of an old-fashioned log fire was making its way above the surrounding forests. Here the five "new settlers" labored together, ate, drank, slept, and whiled away their leisure hours, until the following May. Meantime improvements had been made, and three or four additional log shanties erected, and it began to look like a really prosperous and thriving settlement.

About this time Mr. TEN BROECK caught the "Western fever," and disposing of his land interest to Mr. PEET, one of his companions, he, accompanied by Capt. ROBBINS, left for the West. They traveled on foot, carrying their own provisions, and generally looking out their own road. They traveled thus over a portion of Pennsylvania, Ohio, Michigan, Illinois, Indiana, Kentucky, and Virginia. The greater portion of the country over which they passed was thinly settled, and many nights they spent in the open air, but their rugged constitutions carried

them safely through all exposure. They had many narrow escapes, which Mr. TEN BROECK and Capt. ROBBINS to this day take great pleasure in rehearsing. We must mention two incidents which occurred to them while traveling through Indiana.

The scene of the first incident is laid at or near Brookville, Ia. As they approached the settlement, they were overtaken by five or six men on horseback. Riding up to our travelers, they slackened their speed and began a conversation upon various subjects; after exhausting everything on their part, our heroes made a few inquiries touching the prices of land, the prospects for growing crops, &c., &c., and among other questions, asked where *they* belonged, whither *they* were going, and what *they* were looking for? Instantly the captain of the band, (who afterwards "proved himself," as Capt. ROBBINS expresses it, "a true gentleman,") replied, "we are looking for just such fellows as you are," and, sniting his actions to his words, sprung from his horse, and, clapping his hands upon Mr. TEN BROECK and Capt. ROBBINS, said, "I arrest you for burglary and robbery!" Here, indeed, was a situation! Astounded at the charge made against them, they contented themselves with a simple denial of all knowledge of the transaction, and declared themselves able to establish beyond a doubt their entire innocence. They were, however, conducted to Brookville, then a mile or two distant, under a strong guard, four of the six horsemen dismounting, and seizing the prisoners by either arm, the more effectually to prevent escape. Upon reaching the settlement the whole town was in commotion. Men, women, and children were hastening to the public square, whither "the robbers" were conducted. Here they were the observed of all observers, and from various quarters of the crowd Mr. TEN BROECK and Capt. ROBBINS had the pleasure of hearing their "suspicious looks" and "rascally countenances" descanted upon. Capt. ROBBINS contends now, that Mr. TEN BROECK was the most remarked; he says he was the largest man, and not by any means the handsomest, and he could hear from a looker-on now and then remarks like the following: "That big fellow looks like a highwayman,"—"he's an ugly customer," &c., &c.

But Mr. TEN BROECK preserved his equanimity, as did also Capt. ROBBINS. They demanded a trial, and were forthwith marched to the office of the village magistrate. They were accompanied by six men armed with muskets, three before and three behind, into the presence of the court. Here they demanded to know the nature of their

crime. The charge was made, and among other items stolen was \$80 in specie! The two together had about this amount in silver, and how to account for the possession of it they did not know. They had obtained it on their journey, and as specie was scarce, and everybody knew it, this circumstance, if disclosed, would tell strongly against them. But they demanded to be searched, and declared their willingness to submit to anything but personal violence and insult. They exhibited their proofs, and satisfied the court, jury, and the citizens that they were innocent, wholly and entirely. They were not searched, and Capt. ROBBINS attributes their discharge, which of course followed, to Mr. TEN BROECK's boldness and perfect self-possession in their trying situation. That night they were made the guests of the town, and were feasted and toasted to their fill. Capt. ROBBINS says he thinks he was "boozy" when he went to bed, and is quite positive Mr. TEN BROECK "felt well." The next morning they called for their bill, and were told by the landlord that no charge had been made, and he refused to take anything. The proprietor of the hotel proved to be the leader of the band who the day before had arrested the travelers for burglary and robbery, and he wished to do all in his power to regain their good opinions, and they then parted with the very best understanding. A large deputation of citizens accompanied them a mile or two on their journey, and when they left there was a general shaking of hands. Many congratulations and a thousand good wishes were bestowed upon the young *travelers*. From criminals they had become honored guests, and were proud of the good impression they had left.

The next day, as they were nearing an Indian trading house upon one of the principal rivers of Indiana, and at least forty miles from Brookville, they were overtaken by an Indian on horseback, fantastically dressed with feathers, skins, &c., &c. Upon coming up, Mr. TEN BROECK inquired "how far to Indian trading house?" The Indian replied, "you give me whiskey, I tell!" This Mr. T. declined to do, very emphatically, for their supply was very low. The Indian was told they did not need his services, and bid begone. In an instant he sprang from his horse and drew a long-bladed, two-edged knife, and made for Mr. TEN BROECK. Both Mr. T. and Capt. R. were without means of defence, if we except their walking sticks. Mr. TEN BROECK had a very large one, and when he discovered the intention of the Indian, he raised that and made sundry warlike demonstrations not entirely satisfactory to the red man, who, seeing the odds he had to con-

tend with, made the best of his way into his saddle, and, with a yell and whoop, was soon lost to view in the forest. Mr. TEN BROECK and his companion, it may well be imagined, kept a keen look-out the balance of their way to the trading house, lest Mr. Indian should fire upon them from some secure hiding place along the road. They were, however, not molested, and reached the settlement in safety.

After spending some days at the trading house looking for a chance to locate, which they failed in securing for want of money, they turned their steps homeward. They arrived at Franklinville in the latter part of August, 1817. Here they remained for a few weeks, when Mr. TEN BROECK and his brother CORNELIUS returned on foot to Otsego County, by the way of Buffalo, Niagara Falls, Rochester, &c. But little of the wealth and splendor which now mark these three places was then visible. Buffalo had three years previously been burned, and had, altogether, not more than twenty new buildings, and these of the smallest and cheapest kind; Niagara Falls was a wilderness, and what are now its streets, parks, and princely private mansions and public buildings, were but tramping and hunting grounds for the border Indians; while Rochester was only a respectable country village, not unlike the many which dot the County of Cattaraugus at this day.

The greater part of the fall and winter of 1817-18 Mr. TEN BROECK spent at his father's house. In February, 1818, accompanied by Cornelius, he returned to Farmersville, the settlement he and his companions had begun two years before. In the fall following he contracted for 50 acres of land, and immediately set himself to work to build a log house. This he completed and moved into during the winter, being his own cook and house-keeper. This log house Mr. T. lived in, with an addition or two, until 1838, we believe, when he built a new and modern mansion. The "old log house," though somewhat dilapidated, is now used as a hay barn, and stands within thirty rods of his present residence. The young pioneer, as we have intimated, kept "bachelor's hall;" but he, not unlike young men in his situation, thought "it not good to be alone, and so after a residence of two or three years in his log house, he married Miss FREEMAN, a daughter of Judge FREEMAN, then one of the Judges of the old Court of Common Pleas of this county. Mrs. TEN BROECK is a model farmer's wife, frugal, industrious, and is distinguished for her simplicity of manners and great moral worth. She is as active now in her old age as our modern girls are at twenty. Her health is good and her constitution unimpaired, and we

trust she may live many years to enjoy the fruits of her own and her husband's industry.

Soon after Mr. TEN BROECK's marriage in 1822, he began to enlarge his borders, adding a little every year—fifty or one hundred acres—and has continued these additions for thirty-five years. Now he numbers his acres by the thousands, and his worldly wealth by tens of thousands. He is to-day the possessor by deed of between five and six thousand acres of land, made up entirely of improved farms; it lies in a straight strip, of about six miles long and a mile wide, adjoining the old homestead farm. This extensive farm, or rather this multitude of farms, has his personal superintendence, and some estimate may be formed of his abilities and his active mind, when we say that he directs the whole machinery of his vast estate, even to the smallest and most unimportant matters. Although now over 64 years of age, he rises at four o'clock, winter and summer, and after three or four hours' attention to the business of "the farm," or by nine o'clock, he is ready to attend the calls of his friends, purchase cattle, buy lands, or do any other business which may require his attention. He manages his business with an eye to profit, endeavoring to accomplish the greatest amount of labor with the least possible force. Not that he over-works his men, but that he may so employ all, that when the day, week, or month is ended, he will not need a telescope to discover where they have worked, or what they have done. His present force is six men! These are so disposed upon every part of his lands that the whole farm is heard from every night. During haying and harvesting this force is increased to twenty-five, and often thirty.

Raising, purchasing, and driving cattle is the principal business Mr. TEN BROECK carries on. He usually winters six or eight hundred head of cattle. Last year he wintered five hundred head, and notwithstanding the great scarcity of hay, oats, corn, and every kind of fodder, they were brought out this spring in good condition. He buys in the spring and through the summer two and three year old cattle, keeps them through the winter, and starts them for the eastern market as early as September following. During the summer his herd is largely increased, so that by July or August he seldom has on hand less than twelve or fifteen hundred head. This immense cattle business makes it necessary that he should have a large portion of his lands in meadows and pastures. His usual hay crop amounts to about five hundred tons. This is all housed, requiring the use of nearly, if not quite forty

barns. His home barn is a model of its kind. It is forty feet wide and one hundred feet long, perfect in all its arrangements, and is capable of affording shelter for one hundred or more head of cattle. It is worth a day's drive to see how substantial, handy, and perfect it is in everything. We hardly think its equal, made of wood, can be found west of Cayuga Bridge.

Notwithstanding this vast cattle business, Mr. T. cultivates yearly some two or three hundred acres of land. He has this year large fields of wheat, oats, corn, peas, beans, potatoes, &c., &c.; probably not less than three hundred acres are thus employed.

In 1822, Mr. TEN BROECK was appointed by Gov. YATES an Associate County Judge. His term of office expired in 1827. In 1837 he was reappointed by Gov. MARCY, and held the office and discharged the duties faithfully, acceptably, and honorably, until the adoption of the new Constitution in 1846. During the interim from 1827 to 1837, he was appointed an Agent of the Holland Land Company, charged with the duty of collecting the debts due the company, in the Counties of Cattaraugus, Allegany and Wyoming. It was his habit to traverse these three counties twice a year, collecting money where he could get it; and when this was not to be had, and the settler desired to turn out cattle instead, he would drive these to a convenient station, and when a drove was obtained send them to market, whither he went, superintending their sale, and returning the proceeds to the Holland Land Company's Office. He held this appointment until the Holland Land Company sold their interest to other parties, and was for two or three years the agent of the company's successors, represented by Hon. STALEY N. CLARKE. Thousands of dollars passed through his hands, every fraction of which he accounted for. He left a clean record — an indisputable evidence of his strict honesty and rigid uprightness.

In all the public trusts committed to Judge TEN BROECK, he has exhibited the same fidelity and devotion to the right, and the same industry in the discharge of his duty. No man can, with truth, say, PETER TEN BROECK has knowingly wronged him in person or property. Honesty and honorable dealing have been his characteristics through life. He never took advantage of the poor, or broke his word with the rich. An incident which occurred many years ago will illustrate more forcibly his determination to keep his engagements, even at a sacrifice.

He had a large quantity of oats on the ground, as he thought, two or three thousand bushels. Being at Olean, he was asked by Hon. F. S. MARTIN if he had any to sell. Yes, he had, he thought, a thousand bushels. Judge MARTIN agreed to take that quantity and give him eighteen pence per bushel, deliverable when called for. The oats were harvested, threshed, *and sold to other parties*, Judge TEN BROECK forgetting entirely the sale he had made to Judge MARTIN. Late in the fall Judge TEN BROECK was at Olean again, and Judge MARTIN told him he expected the oats he had purchased, and would like to have him (TEN BROECK) begin to haul them pretty soon. The Judge was amazed. He had forgotten all about the trade, and had sold all his oats! "However," said he, "a bargain is a bargain. I agreed to let you have 1,000 bushels of oats at eighteen pence per bushel, and you shall have them." Notwithstanding there was no writing to hold him to his trade, and the fact that oats were then worth twenty-eight cents per bushel, he actually purchased one thousand bushels and delivered them to Judge MARTIN, suffering a loss of ten cents on each bushel, that his contract might be fulfilled and his word kept good. The soul of honor and integrity himself, he abhors and despises a departure from the right in others. He deals honestly and fairly with every man; scorning to take any advantages himself, he scorns alike him that would, and him that would submit to them.

In politics, Judge TEN BROECK, as his judicial appointments would indicate, is a Democrat, and he quotes Jefferson and Jackson as the exponents of his political faith. He has never sought official honors, but his position has been so prominent that he could not, and has not escaped party preferment. His first elective office was in 1821. He was then elected Supervisor of the town of Farmersville, or Ischua, then made up of Farmersville, Lyndon, Franklinville, Ashford, Yorkville, and Machias. He has been elected to the same office many times since, and usually without serious opposition. In 1842, Judge TEN BROECK was nominated by the Democrats of this Congressional district a candidate for Congress. Hon. ASHER TYLER, now Land Agent for the New York and Erie Railroad Co., was his competitor, on the Whig ticket. Of course, he was defeated, for the district was, as the Judge expresses it, "ruinously Whig," but he ran far ahead of his ticket. In his own town and immediate neighborhood he got two votes to his opponent's one, and thus he had the assurance that those who knew him best were most desirous of conferring upon him additional honors.

We should have said before that Judge TEN BROECK was in actual service in the war of 1812; was stationed at Sackett's Harbor, and, we believe, held an ensign's commission. After peace was declared, with something of the war fever upon him, he attained the rank of Colonel in the State militia, and held that position for many years after he came into this county. This, we dare say, makes up the whole of his military career.

The Cattaraugus County Agricultural Society was organized November 11, 1841. Judge TEN BROECK was elected its first President, and was subsequently re-elected in 1842-3.

Judge TEN BROECK is now over 64 years of age, and yet he is hale, hearty, and as vigorous as at forty-five. A man of iron nerve and ample proportions, being over six feet in height, and still possessing a rugged, unbroken constitution, he bids fair to retain his health and strength for years to come. In private life he is courteous, of easy manners, and cordial and confiding to his friends. He is generous to the poor, prompt with aid in case of need, and gives with a liberal hand whenever and wherever necessity requires. He attained his present high rank as a private citizen, and has become the largest land owner in western New York, by the closest attention to his business and the practice of frugality, without being in the least open to the charge of covetousness or penuriousness.

But we have extended this sketch to a much greater length than we at first intended. We may remark, in closing, that Judge TEN BROECK is estimated to be worth \$200,000, every farthing of which he has obtained in the legitimate prosecution of his business, and no man is the poorer by reason of his success. He is now, in his old age, a living exemplification of the truth of the adage, "honesty is the best policy," for every business act of his life has been made to square with the strictest rule of right. Speculations he has avoided, and that too while possessing means, and knowing pretty certainly of ways in which he might enrich himself ten fold.

Having thus briefly sketched Judge TEN BROECK's history, we leave him to the quiet enjoyment of his old age, only wishing that he may live many years to enjoy the fruits of his hard-earned competence, the full measure of his worth as a man, and the friendship and companionship of troops of friends and admirers.

Frederic J. Martin

Published by John Munster, Little Valley, N. Y. 1857

FREDERICK S. MARTIN.

FREDERICK STANLEY MARTIN was born in the County of Rutland, Vermont, on the 25th day of April, 1794. He was the youngest of six children, three of whom were boys. His education, like most farmers' boys of that day, was obtained at the district school, which he attended until he was seven years old. About this time he left his mother's house, (his father died before his recollection,) and spent three or four years with his relatives, who resided in that vicinity. At the age of ten years he left Vermont, and became a member of his uncle FREDERICK STANLEY's family, at New Hartford, in this State. There he remained five or six years. In 1810, young MARTIN having arrived at an age, as he thought, that warranted him in looking out for himself, left his uncle's hospitable roof and proceeded to Whitehall, where, after a short time, he obtained a situation as clerk in the mercantile establishment of a Mr. ANDERSON. There he spent two years, and then received the appointment of steward of the Steamer "*Vermont*," Capt. WINANS, Master. The "*Vermont*" was employed in the service of the Government, and ran to and from all ports on Lake Champlain. The captain, clerk, pilot, and in fact all of young MARTIN's superiors, were addicted to drinking, and when either was unfit for service, he supplied his place, and not unfrequently he was compelled to act as captain, clerk, pilot, steward, and cook at the same time.

The war of 1812-13 followed, and during its continuance he resided at Burlington and Shelburne, Vermont. Immediately after peace was declared in 1815, he shipped from Newport, R. I., having gone thither for that purpose, on board a merchantman as a common sailor. The vessel sailed in the spring of 1816, to New Orleans, where she took on board a cargo of cotton, and thence she cleared for Liverpool. He returned to New Orleans in the same ship, where he was honorably discharged, and soon after returned to New York, after an absence of eighteen months, improved in health and possessed of considerable nautical knowledge. He hastened home, and after a short sojourn among his friends and relatives, he left the "Green Mountain State" for the western part of New York, then in common parlance "the far West." He reached Canandaigua late in the fall of 1817, where he remained during the winter, "looking about," and doing little or nothing to

increase his possessions. In the spring of 1818, he came to Olean, and here he has lived ever since. He brought with him a stock of goods, consisting mainly of dry goods and groceries, and these he bargained off for lumber, which he rafted and sent to Cincinnati. By this transaction he realized a good profit, and upon his return he invested his increased means in lumber, and again sought the Southern markets. Succeeding as before, the following year, 1820, found him a large dealer. Failing, however, to get off with his rafts, arks, flat boats, &c., in season, misfortune overtook him, and when he did reach the market, lumber had become a drug. It fell to such a figure as to be ruinous to all engaged in its traffic. Mr. MARTIN lost heavily, in fact, his all, and was besides nearly \$2,000 in debt. He failed, with a score of others, and while he owed \$2,000, which he could not pay at once, he asked no compromise, no discount—nothing but “time” to meet all his engagements. This was given him, and soon by industry and economy he was enabled to pay every dollar of his indebtedness.

In February, 1820, Mr. MARTIN married Miss CORNELIA RUSSEL, daughter of SAMUEL RUSSEL, of Pike, Allegany County, N. Y., one of the earliest settlers of that section. Mrs. MARTIN is still living in the enjoyment of good health, an ornament to the circle in which she moves, and beloved and esteemed by all who are brought within reach of her kindly influences.

In 1821, he leased of FREDERICK A. NORTON “The Coffee House,” a small hotel then standing upon the present site of the Olean House, in the village of Olean. Together with the lumber business then just beginning to be developed, and the steady, though not large emigration to the west and south, “via Olean Point,” this new business proved to be profitable. He kept this hotel ten years, and during that time had enriched himself sufficiently to become owner as well as proprietor of the property, and have a handsome surplus besides. In 1831, he leased his hotel and entered actively into mercantile pursuits, associated with his brother-in-law, OLIVER M. RUSSEL. The business of the new firm extended over a large tract of country, and fortune smiled upon him and his efforts.

In 1834, his brother-in-law left the concern, and Mr. MARTIN continued alone, gradually enlarging his business and constantly improving in financial ability. In 1836, a year memorable for its land speculations and unparalleled “high prices,” Mr. MARTIN made his first bold stroke for wealth. He sold the property now known as the “LYMAN

Farm" for \$26,000, and in due time received every dollar of that amount. By this single transaction he was made one of the "wealthy men" of Cattaraugus County; for in those days a \$30,000 citizen was looked upon as being "very rich." He continued his mercantile business up to 1851, when he transferred it to his son, STANLEY MARTIN.

During these twenty years of mercantile life, Mr. MARTIN maintained an unsullied name and fame. His integrity and uprightness was acknowledged by all, and he was known here and elsewhere as a clear-headed, substantial merchant. During this long period he had, besides Mr. RUSSEL, but one partner, and this was Mr. JAS. G. JOHNSON, whom he had reared from a boy of fifteen, and who is now a respected and prominent citizen of Allegany, in this county. Since his sons STANLEY and RUSSEL succeeded him in his mercantile operations, he has given his undivided attention to his extensive farming and lumbering interests.

While Mr. MARTIN has been accumulating an ample fortune, he has not been lax in his determination to build up the village of his adoption. Monuments of his enterprise are visible on every hand. In 1842 he rebuilt the Olean House upon so extensive a plan, that at this day it is the largest hotel under a single roof in this county. Without referring to his dwelling houses, of which he has built many, we may mention his flouring mill, built in 1852. This is a model structure, costing not far from \$10,000, and is perfect in all its appointments, and second to no mill in this region for size and power. Last year he built a large gang saw mill, capable of manufacturing fifty or sixty thousand feet of lumber daily; and it is safe to say that it is not excelled by any water mill on the Allegany River.

In all public enterprises Mr. MARTIN has been among the first in liberality and public spirit. In the village of Olean are four handsome churches, to the building of three of which, at least, he has contributed bountifully. To the Olean Academy he is a large contributor, and was the first President of the Board of Trustees, an honor he has well earned and a position he was well calculated to fill. He holds this appointment at the present time.

Mr. MARTIN is the father of nine children, seven of whom are now living. It is frequently remarked that the sons, of whom there are four, partake strongly of their mother's energy, industry, and perseverance, while the daughters, three in number, resemble in mind and manner the quiet, uniform solidity of the father.

Mr. MARTIN has been much in public life, and in each and every position to which he has been called, either by the partiality of his fellow citizens, or through the appointing power of the party to which he has for more than thirty years been attached, he has exhibited the same devotion to the right—the same determination to do his whole duty. His public life began in 1826, when he was appointed by Gov. CLINTON a Major of the 226th Regiment New York State Militia. He held this commission and performed the duties imposed upon him until 1830, when he was promoted by Lieut. Gov. THROOP, to the rank of Lieutenant Colonel. He resigned this appointment in 1833, the military spirit of this region having “died out.”

In December, 1830, he was appointed Postmaster at Olean. This was during Gen. JACKSON's first term. He neither sought the appointment, nor expected it, for all his political sympathies were at variance with the party then in power. He did not know at the time *why* he was appointed, but learned subsequently that his friend, JNO. MCGEE, then a representative in Congress, had secured the appointment contrary to party usage. He held this office through three successive administrations, and was removed by Mr. VAN BUREN's Postmaster General, in 1839. During the campaign of 1839–40, Mr. MARTIN became an active opponent of the party in power, and rendered efficient service to the “hero of Tippecanoe and Tyler too,” and for this was stripped of his official robes, greatly to his relief. The office was a tax upon him, and he frequently asked his Democratic friends to seek and obtain his removal, and they finally gratified him.

In January, 1840, he was appointed by Gov. SEWARD “a Judge of the County Courts of Cattaraugus County.” Judge MARTIN has the honor of being the only Whig who ever received the appointment of Judge under the then organization of the County Courts, it so happening that when a vacancy occurred, before and after his term, the Democrats were in power. He held the office of Judge for five years, and performed the duties devolving upon him, faithfully and acceptably, and left the bench universally respected. He was succeeded by ASHBEL HURD, of Gowanda.

The Genesee Valley Canal was authorized by the Legislature of 1836, and from that time to this, (and long before it, in fact, for he and his friends DAVID BOCKES and DAVID DAY, and their compeers from Olean to Rochester, began the agitation of the subject as early as 1823,) he has exerted all his influence, devoted much time, and expend-

ed not a little money, in securing the completion of this "outlet for south-western New York." His devotion to this great work kept him prominently before the people of this county, and in 1847, this, with other less important questions, induced his nomination by the Whig party of this district, for State Senator. He was elected, and the manner in which he discharged the duties of this high station gave very general satisfaction. Against his wishes, he was made a candidate for re-nomination, but was defeated in the convention by the old political hacks of the district, who had other "axes to grind." This defeat so exasperated the people of his Assembly district, that at their Assembly district convention, which met soon after, he was nominated by acclamation for member of Assembly, and was, of course, elected.

During his term in the Senate he was a member of the "Canal Committee," one of the most important committees of that body. In the Assembly he was made a member of the same committee, and by this means he was enabled to render essential service to the interests of a large portion of his constituents.

Among the members of the popular branch of the State Legislature of 1849, and there were many able men in it, none commanded more respect or were more universally regarded as clear-sighted, far-seeing, conscientious legislators, than Hon. F. S. MARTIN. His sacrifices the three years he was in the Legislature—the neglect of his private affairs—the loss of the comforts of a home, &c., were very great, yet he had the satisfaction of knowing, that through his instrumentality the work upon the Genesee Valley Canal, which had long been suspended, was resumed, and its ultimate completion provided for.

In the fall of 1850 Judge MARTIN was nominated and elected to the thirty-second Congress. This was during the most fearful political excitement the country had ever experienced. Gen. TAYLOR had died, and MILLARD FILLMORE had succeeded him as President of the United States. The agitation of the slavery question consequent upon the organization of territorial governments for Utah, Oregon and Washington, and the admission of California with a constitution prohibiting slavery within her borders, had aroused a storm North and South, East and West, that came nigh sundering the bands of the Union. Mr. FILLMORE marked out a plan of adjustment in regard to the difficulties which threatened so seriously the peace and harmony of the nation, and Judge MARTIN, as the representative of a strong Whig constituency, while opposed to some of those measures of settlement, deemed it to

be his duty to accept and support them as a whole, convinced "they were the best that could be obtained." This is not the occasion to discuss the propriety or wisdom of his course. No man, we dare say, will question the purity of his motives or doubt his honesty in what he determined, after mature reflection, to be his duty both as a man and a patriot. Having decided to support the "compromise measures of 1850," and the leading acts and policy of Mr. FILLMORE's administration, he did not falter or turn to the right or left in doing what he could to render that administration efficient and acceptable to the people of his district. His course in Congress was marked, as his whole public life had been, with a consciousness of the important trust committed to him, and every act of his while there will bear the closest scrutiny. He earned the confidence and esteem of his colleagues, and won for himself an enviable reputation for industry and integrity. His acute discernment and comprehensive line of thought made him a distinguished man among his fellow members; and when he rose to give his views upon any subject—and these cases were rare, for he is a man of few words—he commanded close attention, and was listened to with more than ordinary gratification.

Since the close of his Congressional term, Judge MARTIN has withdrawn, almost wholly, from public life. As the weight of years creep upon him, he becomes more and more attached to his family circle and its comforts, and less occupied with the busy scenes transpiring about him. He is the possessor of an ample fortune, the care and supervision of which requires his whole attention. His "home farm" contains 1,200 acres, 600 of which are improved. He owns, besides his saw and grist mill, farm buildings, &c., two timber lots, containing together 1,700 acres of land, and a large amount of village property. He is doubtless worth \$125,000 above and beyond all indebtedness.

In private life Judge MARTIN is hospitable to the stranger, frank and free-hearted with his neighbors and friends, and kind and generous to the poor. He is a constant thinker, and one is liable to mistake his seeming abstracted manner for unsociability or lack of courtesy. This is not the case. When "out of thought," and freed from the cares and perplexities of business, he is one of the most companionable and sociable of men. Judge MARTIN's word is his bond. He deals honestly with all men, and requires the same fidelity from others that he practices himself. He will not stoop to do a "small thing," nor suffer it to be done by others if he can prevent it. He early conceived a

hatred of distinctions among men based solely upon wealth, and is, therefore, generous towards all, rich or poor, high or low; he is high spirited, without exhibiting the least ostentation or pomp, and eminently just from an inherent love of right.

Judge MARTIN is now more than sixty-three years of age, and possesses a strong, vigorous constitution, and is in the enjoyment of good health. We trust he may live many years to adorn the position he now occupies—a self-made, honest, sagacious, prudent citizen—and be known and appreciated for his worth as a man, and his cordiality as a friend and neighbor.

In 1849, Judge MARTIN accepted the invitation of the Committee, and delivered before the County Agricultural Society the Annual Address. This document contains so much of interest to our citizens, referring as it does to the early history of the county, and exhibits in so clear a light the natural turn of the author's mind, that we are unwilling to let the occasion pass with simply an allusion to it. We make such extracts from it as we deem most interesting. The following occurs at the opening of the Address:

“The earth is termed our mother; from her bosom all draw their support. The rich, the poor, the bond, the free, the prince and the peasant, are equally dependent on her for the temporal blessings with which their daily wants are supplied. How important, then, its study; are we certain that we are not misled by the dim light of nature? Should we not give an impulse to the already awakened activity—study into the wonderful economy of Nature, its order and agencies?”

“An all-wise Providence has placed man here for some good. The sanctuary of Nature is thrown wide open, and he may fearlessly enter and partake of its blessings. The earth, aided by sun and light, is endowed with capacities to produce vegetable matter sufficient to sustain and support life.

“The useful and the beautiful are harmoniously blended—the former in the substantials necessary to a healthy condition of body; the latter in objects gratifying to the sight, as the soft blending tints of a far-off landscape, the shifting play of light over waving fields of grain, the

meandering stream impatient of restraint, revealing a world of untold magnificence, and producing as it were within us an ideal world, opening on the mental eye. It varies in form and properties, and its particles go to make up what we denominate soil. It appears to us a heterogeneous mass of matter, covered with vegetable and mineral remains, which by the wonderful economy of nature are undergoing change; at one time maturing, at another decaying and yet never lost. Were it not so, the earth would be constantly diminishing in size, and bounds set to its existence.

"The vegetable may grow, mature, and decay; collected to the bosom of the earth by its proper agencies, it affords nutritious food to the new organized plants. In its last stages of decay, the seed, from specific lightness, may be wafted to parts remote, and there germinate as in the parent soil; other particles floating in the atmosphere are again brought down in the refreshing shower—the more evanescent ones by the nightly dews. Whatever falls on the mountains gradually washes in to enrich and fertilize the valleys—whatever falls on the ocean affords support to its teeming millions.

"The relation between vegetables and animals is of the most intimate kind; being mutually convertible, one into the other, and depending on each other for existence. In fact, they are the only natural means by which animal life can be sustained. And as all vegetable matter differs in form, we at once infer that every soil has its natural productions. On sandy portions of land the pine springs up spontaneously. On our low and wet lands, the spruce and willow; while our openings abound with scrub-oak and hazel. Soils charged with excess of moisture, rarely, if ever, produce plants desirable to man or beast; their tender and delicate fibres must have a lighter bed in which to repose, sufficiently dry to admit easily the rays of the sun. Timothy and red-top grow best in moist lands; but constantly saturated with water they soon run out, giving place to tufts of wild grass, destroying the beauty of the farm, and that which is of greater importance, the profits of the farmer.

"Hence the first study of the cultivator should be the properties of the soil, enabling him to adapt the crop to its peculiarities; to prepare it in the proper season, and in the most economical manner; to give a proper rotation to the different grains and grasses; to ascertain approved breeds of domestic animals, which are useful for food, and necessary to aid him in his labors, and will produce the greatest profit

in market; the improvements made in farming implements and modes of culture. These, and a great variety of matters which it is important for the farmer to make himself acquainted with, will give employment to his leisure hours; and the time thus spent will produce as profitable results as his more active labors in the field. Having made these general remarks on the subject of Agriculture, it may not be inappropriate to give a brief sketch of the early history of this county, and then pass on to the more practical part of the subject which has brought us together.

“The first purchase of lands from the Holland Company within our county limits was made by Major ADAM HOOPS, BIRDSEY NORTON, EBENEZER NORTON, and JOEL STEEL, in 1804. Their tract of twenty thousand acres was located on each side of the Allegany River and Olean Creek, and mostly in the first township of the 4th and 5th ranges. They commenced a settlement the same year, and soon after laid out the village of Hamilton, (better known as Olean Point,) which was considered the head of navigation on the Allegany; and I think it is the highest point to which any steamboat has ascended above tide-water, being 1,470 feet: this was performed by the Steamer Allegany, in the spring of 1830.

“From the commencement of the settlement at Olean until the completion of the Erie Canal in 1825, the Allegany was used by thousands of emigrants on their way to the South-western States. They passed down in arks, flat-boats, skiffs, and on rafts. I can call to mind one raft that left Olean with 350 persons on board, in the spring of 1818. In March, 1808, this county, Chautauque, and Niagara were taken from Genesee, and erected into separate counties. The west part of Cattaraugus was attached to Niagara, and the east part to Allegany County, for judicial purposes. The town of Olean was organized by the same Act and embraced the whole county. The first town meeting was held on the Ischua Creek, at the house of the late Gen. JOSEPH McCLURE, in the spring of 1809. JAMES GREEN was elected the first Supervisor from this county at that town meeting. The first saw mill erected in the county was on Haskell Creek, about three miles above Olean, and was built by JAMES GREEN, in 1805. HENRY CONRAD built the first grist mill, on the Ischua Creek, about the same time; this was situated two miles below the present village of Franklinville.

“The town of Ischua was organized in 1812, (since changed to Franklinville,) Perrysburgh in 1814, Great Valley and Little Valley

in 1818, Ellicottville, Freedom, Hindsdale, and Yorkshire in 1820. The county was fully organized in the year 1817, and the first County Courts were held at Hamilton, (now Olean,) in July of that year. TIMOTHY H. PORTER was the first Judge; JAMES BROOKS, ASHBEL FREEMAN, FRANCIS GREEN, and WILLIAM PRICE were Associate Judges. ISRAEL CURTIS was the first Sheriff; SANDS BOUTON, County Clerk; HENRY WOOSTER, Surrogate; SYLVENUS RUSSELL, County Treasurer. But two of the first commission on the bench remain with us, and they have fully complied with the command given to Noah and his sons, and bid fair to remain for long years to bless their posterity and reap the reward of well-spent lives. The first courts were held in Ellicottville, in July, 1818, at the house of BAKER LEONARD; that house and the Company's Land Office were all the dwellings then erected in that place. A court house and jail in one building was built soon after; this was burnt down in the winter of 1829, and the present court house and jail were built the same year.

"Settlements were commenced on the Cattaraugus Creek, and on the waters of the Conewango, as early as 1810, but no general settlement of the county by a farming population can be placed anterior to 1817; and singular as it may seem to the younger portion of this audience, the fact is nevertheless true, that lands were held higher in this county up to 1820, than they were in Niagara or Chautauque; and your county records show that village lots in Hamilton, (*now Olean,*) sold at a higher price until 1822, than they were bringing in Buffalo.

"The Allegany River was then used as the great commercial highway to the valley of the Ohio and Mississippi, and was deemed of more importance than lake navigation. The completion of the Erie Canal changed the whole order of things, the tide of emigration changed to the upper lakes, and Cattaraugus was almost forgotten by the hardy pioneer. The splendid white pine on the Allegany and its tributaries had attracted the attention of men fully equal to the task, and every portion of the county gave promise to all who would obey the Divine command. The sound of the woodman's axe rung along the valleys, and the sides of our hills became dotted with the dwellings of civilization; the war path of the red men gave place to the more comfortable highway; the howl of the wolf to the bleating of our flocks.

"The scenes of the present day are of a different character in Cattaraugus from those of 1818, when I became a resident of the county;

and when reviewing the numerous difficulties which have been overcome, and the present condition of things, I see no cause to regret for the past, and much to hope for the future.

"The completion of the Erie Canal more fully developed the resources of Western New York, and the prominent men of that day who had given that splendid work their most hearty support, never lost sight of the importance of its connection with the Allegany River. From them emanated the project of the Genesee Valley Canal; and it had an important influence with the first movers of the New York and Erie Railroad. When these two works shall have been completed, our county may with truth be ranked among the best in the State for grazing purposes. This may seem a bold assertion, unsupported by facts; but when you contemplate her secluded situation, and the rapid progress already made under her local disadvantages, what will be her condition in a few years after the completion of the New York and Erie Railroad and the Genesee Valley Canal, and in an agricultural point of view? As an evidence of her capacity to produce cattle, sheep, butter, cheese, &c., permit me to make some extracts from the census of 1845:

"Our population in 1830, was 15,726; in 1845, it was 30,169; in the year 1844, the county produced 177,000 bushels of wheat, 13,000 of barley, 96,000 of corn, 459,000 of oats, (omitting fractions.) It contained in 1845, 45,256 neat cattle, one-third of which were cows; from which 1,284,535 lbs. of butter and 567,807 lbs. of cheese were made. We also had at that time, 6,908 horses, 102,780 sheep, 30 churches, 220 common schools, 24 grist mills, 144 saw mills, 67 clergymen; besides lawyers, doctors, merchants and land officers to our heart's content. That our next census will show a large increase in our population and products, no one at all acquainted with the county will doubt.

"The difficulties attending the first settlement of a heavy timbered region to a great extent have passed. We are now in a position to improve and better our condition as farmers, and to give an impetus, energy, and activity to the various improvements connected with Agriculture. I would not be understood as recommending what is often termed book farming in its fullest extent; but allow me to say, that a prejudice exists, which cannot too soon be removed, against improved farming implements, improved breeds of animals, new modes of culture,

and more especially against all books and periodicals on these interesting and valuable subjects.

"This county, in common with most others in the State, organized a County Agricultural Society in 1841, and the Hon. PETER TEN BROECK was the first President. This society, like most improvements, has had its share of difficulties to encounter, but they have been met and overcome in a spirit which will not be conquered. The display and attendance during the present Fair give undoubted evidence of its valuable services, and should urge the officers and members to still greater exertions. The duties committed to you are of a high character, for it is through the agency of the county societies that we are to look for knowledge of the various and important improvements being brought home to our agricultural population. Your annual county fairs have done much in this way, and their continuance will prove their usefulness.

"Allow me to call your attention to the importance and value of the various agricultural papers and periodicals. Many of these can be obtained at fifty cents or one dollar per year. These would give you a monthly catalogue of the improvements which are continually being made in farming husbandry. No farmer who desires to prosper in his business can afford to be without one or more of them. Our School District Libraries, from their location, can be made of great value to the farmer. The influence of this society will soon procure men qualified to make proper selections, and these libraries in a few years will contain all the valuable publications in relation to cattle, horses, sheep, and swine; their mode of management; the diseases to which they are liable; the remedies adapted to their cure; the best mode of cultivating our various crops; and their preparation for market.

"These books would then be within the reach of all, and it strikes me that it is a very practical way of sowing knowledge, as it were, broad-cast over the county; that a rich harvest would be the result, no one can doubt, who believes that 'knowledge is power.' The formation of farmers' clubs has been tried in many of our towns throughout the State, and are highly commended by all those who have seen their benefits. Town fairs at stated periods, say spring and fall, would prove of great advantage as regular market days, and the information obtained on such occasions would fully repay the outlay of time in attending them. The cattle raised in Cattaraugus already take a high rank in the eastern markets, and are sought for with a zeal which gives

substantial evidence of their value. Let us continue to improve as we have done for a few years past, and our stock will rank with any in the State. The greater portion of this county is well adapted to grazing purposes; our soil, climate, and elevation secure us against the severe droughts which so often destroy the pastures of the more central parts of the state. And the fact that the average time of foddering is less here than in the majority of the counties in the state, is a strong inducement to enlarge as well as improve in this branch of husbandry. The same organic laws of consanguinity govern the whole animal creation, and should never be neglected by any who are desirous to improve their stock. The expense of raising a superior horse is no more than one of our common breeds. And this fact holds true through the whole catalogue of domestic animals. The difference in the market value fully repays for all the trouble and expense of procuring valuable crosses of the different breeds, besides the gratification of a laudable state, county, and individual pride to excel.

"This county is peculiarly well adapted to the raising of sheep; our hills affording them the richest and most reliable pasturage during the season, and our winters are mild in comparison with a large portion of the state, where wool growing is considered a lucrative business. Some more attention is required to improve our flocks, and in the manner of preparing the wool for market. In this branch of husbandry there is nothing to prevent our taking a high rank, but want of attention on the part of farmers.

"The dairies of our county have proved eminently successful, and the exports of butter and cheese have become a large item. They are holding a respectable rank in the market: the county can well sustain a very large increase, and every inducement to those engaged in it to enlarge and improve is offered in the enhanced price and ready sale of their products. The grazing farmer has a decided advantage over those who are engaged in the growing of grain crops; the soil on grazing farms receives a proper return for the crop taken from it with very little expense to the cultivator—and at least sustains itself—and more generally increases in its products. This is not the case on grain farms; they can only be kept up by a proper rotation of crops and the addition of manures more or less expensive.

"Although the largest portion of the county is better adapted to grazing than the growing of grain, the latter should not be neglected, and the supply of animal and vegetable manures, always at the control

of the grazing farmer, will enable him to ensure a plentiful supply of grain for his own use; and those portions of the county which are better adapted to the raising of wheat, can with proper attention furnish a sufficient supply to prevent so large an import of flour from other sections of the State. Spring wheat has proved to be a profitable crop in almost all parts of the county, and my own experience has satisfied me that winter wheat can be cultivated with profit on our pine lands in the vicinity of the Allegany. I have raised it to some extent for twenty years past, and seldom failed of a fair crop when the ground was properly prepared, and the wheat sown as early as the first of September. I have this year raised about thirty acres of winter wheat, a sample of which has been exhibited here, and I have the opinion of wheat farmers that it would be called a fair article in any market. In one field of six acres—clear of stumps, the soil a sandy loam underlaid with gravel, with a rolling surface—the original timber was white pine and oak. Two acres of it are occupied by a young apple orchard; the land was well manured from the barn yard in the spring of 1846; sowed to oats, and seeded with red clover, mowed twice in the summer of 1847. In June, 1848, it was plowed under, ten inches deep, was cross plowed twice, and harrowed between each plowing. Twelve bushels of Hutchinson wheat, rolled in plaster, were sowed upon it the last week in August; fifteen bushels of lime were sown broad-cast on it, soon after it was harrowed in. This wheat was harvested between the 15th and 25th of July last; thrashed a few days since, showing a yield of 27 bushels to the acre, weighing 60 lbs. The remaining 24 acres, which had not been cleared of the pine stumps, were sowed about the same time with $1\frac{1}{2}$ bushels to the acre of the same kind of wheat, and produced 25 bushels to the acre.

“I have in previous years raised wheat equal to this, and it is mentioned at this time to induce others to try it.

“There is one marked feature of our national character which is often displayed in our county: I allude to the great desire of change. The often futile hope of bettering their condition, by some lucky turn in the wheel of fortune, has induced many a farmer who was doing well to abandon all, and seek a new home upon the rich prairies of the west. A large proportion of this class would be very glad if they could return to their old localities, and exchange the ague and chill fevers imbibed in their land of promise for the bracing air and pure water of Cattaraugus.

“There is to some extent a want of taste in the construction of our farm houses and the out-buildings connected with them. All persons, in traveling through any country, form their opinion of its inhabitants by the appearance of their dwellings. A neat and well-ordered dwelling exercises a moral no less than a physical influence over its inmates, and is seldom found in the abode of ignorance, vice, or intemperance. One great advantage attending the judicious construction and location of buildings on a farm, is in fixing the value of the homestead in the minds of the family, thereby rendering the hearthstone more sacred.

“The amount of capital invested in agricultural pursuits is always safer than in mercantile operations; commercial revulsions, the hazards of floods and of fires, often destroy the earnings of a life spent in the latter pursuit. The success of a very few of this class of men is not a proper criterion by which we are enabled to form a correct judgment. They are only the exceptions to the general rule. Of the numbers who have commenced in mercantile business, it has been estimated that ninety-five in every one hundred have failed.

“The professions offer but little better encouragement. The mechanical branches are not so much overstocked, and proffer more inducements to such as prefer leaving the safer pursuits of Agriculture. And when we inquire of a healthy, robust man, sixty-five years of age, what his calling has been, nineteen out of every twenty will inform us that they are farmers. Many other reasons offer themselves to my mind in favor of agricultural pursuits, but I forbear wearying your patience with this self-evident truth.

“And in conclusion allow me to impress upon every young man, that the pursuits of the farmer are not incompatible with the character of a gentleman. He is in a position which enables him to feel a degree of independence which few, if any, professional or commercial men can arrive at, and an education is as important to him as to the professional man, and no substantial reason can be given why it is not. It may not be important for you to be able to conjugate the verbs, and trace out the roots of the dead languages, but it is important for you to know the chemical analysis of the different soils which are daily under your feet, and ascertain their adaptation to the various kinds of crops. Do all in your power to sustain your County Society: its influence is humanizing and exalting. Instead of wishing things better, go to work and make them so. Instead of spending your time in vain regrets for some advantages in our neighboring counties, strive to equal

and to excel them; and not five years will have passed until *cold frosty* Cattaraugus will take a rank among other counties of the State, to which her natural resources and wealth justly entitle her."

CHAUNCEY JOHNSTON FOX.

Few men in the County of Cattaraugus are more intimately connected with its history, or have borne a more conspicuous part in its public events since its organization, than the subject of this sketch. A history of the early settlers of the county, who are identified with its fortunes, would be incomplete without mention of Mr. Fox; and in looking for examples of successful effort to overcome the adverse influences of poverty and humble origin, in the road to honorable distinction, no better illustration can be found in our midst.

Mr. Fox was born on the 21st day of August, 1797, in Tolland County, in the State of Connecticut. His father was a man of limited means, and unable to give his children any advantages of education beyond a meagre training in the Common Schools.

In the year 1818, in the month of August, Mr. Fox left his home, with a view of establishing himself in business, or seeking some occupation that would furnish him a living, and, in company with a younger brother, came to Olean in this county. Not meeting with any employment to his satisfaction, he conceived the idea of going down the river to Cincinnati. He accordingly purchased a skiff, procured a supply of bread and cheese, and, with his brother, set out upon the voyage, with no distinct idea of the geography of the country, or the difficulties of the task he had undertaken. With the ardor of youth, and under the influence of a sanguine and hopeful nature, he did not hesitate to commit himself to the waters, never doubting that it would prove itself to him the "stream of fortune." After sailing down the current for an entire day, they found themselves at night still surrounded by the wilderness, not having seen a white man since they started, and spent the night in their boat upon the water. The next day they proceeded on their voyage, and towards night saw a white man crossing

Samuel Fox

Published by John Manley, Little Valley, NY 1857

the river, and landing, they followed him to his house, which proved to be that of a settler by the name of TOME, well known in the early history of this section of country.

At the suggestion of TOME, who offered to employ both the young men, the further prosecution of the voyage to Cincinnati was abandoned, and the next day they went to work. Immediately upon the commencement of their labors, the brother of Mr. Fox was taken sick with typhoid fever, and confined for a period of eight weeks. The expenses of this sickness exhausted all the means of both of the brothers, and they even sold their clothes to discharge the liabilities incurred; and so severe did the burthen prove, that CHAUNCEY exchanged the last suit he had for an old suit of regimentals that had "seen the wars," for the sake of the difference received. In procuring a physician, he was compelled to travel to Ellicottville, the nearest point where one of these dignitaries resided, the distance being over thirty miles. The nearest physician was at this time in practice at Ellicottville, and although a good physician and an honorable and benevolent man, was in the habit of looking closely to his worldly interest, and demanded pay in advance. To accomplish his purpose, Mr. Fox disposed of some necessary articles of clothing, procured the means, and secured the attendance and services of the doctor.

Soon after the recovery of his brother, Mr. Fox came to Great Valley, and for several years was engaged at lumbering, in the employ of FRANCIS GREEN and Judge CHAMBERLAIN. Finding the labor too severe for his constitution, and feeling that the instincts of his mind and genius were not directed in the proper channel, he turned his attention to the study of the law. He commenced reading in the office of JOHN A. BRYAN, Esq., then the leading lawyer of the county, and in January, 1826, was admitted to practice in the Court of Common Pleas of the county, and was finally admitted as an Attorney in the Supreme Court, in January, 1833. From the period above mentioned, Mr. Fox has followed the profession of the law until after the passage of the Code, in 1848, when he retired to his farm in the neighborhood of Ellicottville, where he now resides, and is engaged in the peaceful occupation of the agriculturalist.

In his practice at the bar Mr. Fox was eminently successful. His strength was mainly as an advocate, and few men in the ranks of his profession possessed the power over a jury, and control over the minds of men, that he exhibited during his entire professional career. His

manner in speaking was earnest, energetic, and while indulging in few of the embellishments of oratory, he was gifted with a native eloquence that took deep hold of the minds and feelings of his auditors.

Aside from his professional career, Mr. Fox has been prominently connected with the politics of the County and State. His connection with the party that opposed the election of Gen. JACKSON, and subsequently composed the Whig party of the country, gave him an opportunity of attaining the distinction to which the partiality of the people called him.

In 1832 and 1833, he was elected to the Assembly from the County of Cattaraugus, and served through the sessions the following winters. In the fall of 1834, he was elected in the Eighth Senate District, a member of the State Senate, in the place of JOHN BIRDSALL, resigned. In the fall of 1835, he was re-elected for the full term, and served until 1840, when his term expired. During his service in the Senate, many important questions affecting the interests of his constituents were before that body, and on all occasions received from him a zealous and efficient support. He was mainly instrumental in securing the passage of the bill to construct the Genesee Valley Canal, and has lived to see that important work in successful operation.

In 1833, while in the Assembly, he advocated and secured the passage of a law taxing the debts of non-residents; and while in the Senate in 1838, brought forward, and sustained almost alone, an Act taxing the lands of non-residents, for the support of roads and bridges. These two measures were of great importance to the interests of the county, and for many years had great influence upon its prosperity. In many of the towns a large revenue is still derived from non-resident landholders for the improvement of roads and bridges, and relieves the people of a heavy burthen in maintaining the avenues of travel in sparsely settled districts. Nor should the labors of Mr. Fox in behalf of the New York and Erie Railroad be forgotten. As chairman of the Railroad Committee in the Senate, he rendered invaluable aid in securing the advancement of this great work; and to no one man in the Legislature during the progress of important bills in aid of the road through that body, are the people more indebted for its final success, than to Mr. Fox. It must be no small gratification to him to know that his services are properly appreciated.

In the exciting political debates in that body he also took a prominent part, and maintained a high position among such men as YOUNG,

Wm. Leavenworth

Published by John Mauley, Little Valley, N.Y. 1857.

MAYNARD, and SEWARD, and others who from time to time were his associates.

He has also held various other political and official stations, by election from the people. He was nominated by his party as a candidate for delegate to the Constitutional Convention, in 1846, but declined to run. He has ever possessed a strong hold upon the affections of the people, and whenever a candidate for their suffrages he has run largely in advance of his ticket.

In addition to his civil honors, he has somehow obtained the military title of "Colonel," but whether from a legitimate claim to the office, as actually one of his "country's defenders," or from the fact of owning in his early years and wearing the above mentioned suit of regimentals, we are not advised; but be that as it may, he would do no discredit to the position if he were called upon to fill it now.

Mr. Fox has succeeded in accumulating a handsome competence, and is now enjoying a life of retirement on one of the finest farms in the county. His taste is particularly gratified in raising stock, and although he may not boast of his "cattle on a thousand hills," his contribution of animals at the County Fairs is at once evidence of his success in this branch of agricultural industry, and his enterprise and liberality in an effort to improve this great and leading interest of our population.

ALSON LEAVENWORTH, M. D.

The subject of this sketch, Hon. ALSON LEAVENWORTH, was born in the town of Woodbury, (near Roxboro',) Litchfield County, in the State of Connecticut, on the 12th day of October, 1788. In his boyhood—as was the custom in the good old "land of steady habits"—he was sent to the common schools to receive that mental culture, to fit him for future usefulness, that the early New England school-masters knew so well how to impart, and, when necessary, how to *impress*, upon the minds of the rising youths committed to their charge; and, at home, that careful moral training which can alone be imparted under the parental roof, and which seldom fails as the monitor to right through life.

During the summer seasons, young LEAVENWORTH worked on the farm with his father and brothers, until he became of age; when he commenced the study of Medicine under experienced practitioners, and pursued his studies diligently until May, 1811; when, having successfully passed the rigid examination peculiar to the allopathic faculty, he was licensed to practice medicine and surgery in his native State. On the 17th October, 1811, Dr. LEAVENWORTH married Miss SALLY CANFIELD, of Woodbury, who has been his accomplished wife for the long period of forty-six years. In the course of his first year's professional service in his native town, he became convinced that the mere study of books and ordinary practice did not qualify him to perform, with confident skill, *surgery* in the varied forms in which cases were likely to occur. The *necessary* education in this most difficult branch of the medical profession could only be supplied at some medical college, located in a large city, in connection with daily hospital practice.

Now, there could be no difficulty in supplying this deficiency; for the novice in Litchfield County could take his seat in the cars of the Housatonic Railroad, and in four hours enter the portals of the Albany Medical College; in sixteen hours, via the N. Y. Central Railroad, be received as a student in the medical department of the University at Buffalo. This is true of 1857; but the time young Dr. LEAVENWORTH thought of completing his education in Surgery was *anno* 1812. Buffalo did not possess a village corporation; Albany was a small city; there was no Housatonic nor a N. Y. Central Railroad—nor even an Erie Canal. The University of Pennsylvania, located in the City of Philadelphia—the then commercial metropolis of the Union—presented the most eligible opportunity for young LEAVENWORTH to perfect himself in his chosen profession; having ample daily hospital practice in medicine and surgery, the most eminent professors in its faculty, and easily accessible by the trading vessels that frequently visited that port.

Accordingly, in the autumn of 1812, Dr. LEAVENWORTH made the voyage to Philadelphia, and entered the University as a student. The Professors of the University, headed by Dr. RUSH, were each eminent in the department of his professorship, and presenting a combined array of learning, talent, and practical medical and surgical skill unsurpassed—justifying its distinguished reputation, and giving it the pre-eminence as the first Medical University on the continent. During his year of *practice*, he did not relax his studies of the best medical au-

thors; so that in attending the several "courses of lectures" at the University, and the hospital practice, he was enabled to make more rapid proficiency than the average of his 500 fellow students.

It was the fortune of Dr. LEAVENWORTH to be one of the class that attended the last course of lectures prepared and delivered by the celebrated BENJAMIN RUSH, M.D., one of the Professors of the University, a distinguished revolutionary patriot, and a Signer of the DECLARATION OF INDEPENDENCE, as a delegate from Pennsylvania, in the Continental Congress.

Graduating in the spring of 1813, Dr. LEAVENWORTH returned to his home in Connecticut, and resumed the practice of his profession, and soon after received the appointment of Surgeon in the Connecticut line of militia, ordered into the service of the United States, in the war with Great Britain, 1812-14. But the well-known dispute between the authorities of the General Government and the State, regarding the right of each to appoint the regimental and general officers to command the State Militia, when called into the service of the United States, prevented Dr. LEAVENWORTH seeing active service under this appointment. The State was undoubtedly right in its claim to officer its own militia—a right that the volunteer regiments in the late war with Mexico exercised, by electing their own officers. During the four or five years following the war of 1812-14, many of the young men of Connecticut turned their attention to the public lands granted to that State, by Congress, for her services during the Revolutionary War. These lands were in the State of Ohio, constituting a large territory in the northern portion of the State, and bordering on Lake Erie, and were reserved to the State of Connecticut, (as before observed,) embracing the district now familiarly known as the "Western Reserve,"—then, as the "Connecticut Reserve."

In the spring of 1818, Dr. LEAVENWORTH decided to emigrate to that far-distant State. Accordingly a large covered wagon was prepared and fitted up with the household goods; a yoke of working oxen were purchased; the arrangements being all completed, the solemn (and final, as all believed,) leave-taking ended; in June, bidding farewell to the "land of steady habits," the long journey was began, and in four weeks the party arrived in the village of Batavia. There they halted to recruit their team and rest themselves after the fatigues of the slow, tedious journey. Reader, think of that journey of four weeks, with ox teams, that could now be performed in sixteen hours!

While sojourning at Batavia, Dr. LEAVENWORTH became acquainted with the agents of the Holland Land Company, by whom he was posted up in regard to the lands in CATTARAUGUS COUNTY. Meeting occasionally with persons who had settled there, and from their representations of the healthfulness of the climate, its unsurpassed, pure spring water, the good quality of the soil, and the great quantity of fine timber, he decided to go and examine for himself. After about a week's tedious journey, with the ox team, through the almost unbroken wilderness of "cold Cattaraugus," on the 25th of September they reached "the village" of Ellicottville, consisting of the "public square," thickly studded with the stumps of the recently fallen trees, the Land Office, a few log tenements, and a "hotel." To revert back, one would naturally suppose that the demand for a doctor and the prospect for a cornucopia were equally dubious! Not so, however; for the "ills that flesh is heir to" follow alike the back-woodsman, the villager, or the denizen of the crowded city; and it was not long before the doctor had patients—many, doubtless, severely taxing his patience without replenishing his garner, though extending his fame. As the settlers located here and there over the country, Dr. LEAVENWORTH received calls as necessity demanded: sometimes near by, frequently a few miles off, quite often long distances; from whatever quarter came the summons, true to his tutelar divinity, (*Æsculapius*,) the horse was saddled, the saddle-bags and *axe* prepared, and the doctor was off upon the rough journey of mercy, hope, and danger. In those days the axe was to the doctor a necessity to "spot trees" to find his way back, and when at the patient's shanty or log house, to cut browse for his faithful horse, and not unfrequently to cut firewood for the inmates. The patient served—a hearty meal of mush or samp disposed of—the invalid's blessing—the doctor remounts and starts on his homeward journey, when he is met by messengers who require his attention in other directions; and after a few miles through the woods, strike an Indian trail, which is followed up the Little Valley Creek, over by the Drew gulf valley, till the second patient's house is reached—the sufferer's necessities attended to, the horse browsed, when a "bee line due north" is struck, and over hills and valleys goes the doctor, 20 miles, to a third patient, on the Cattaraugus Creek. A sound night's sleep on a hemlock brush bed, and in the morning taking the settler's trail, the doctor wends his way homeward, which he reaches at nightfall, after several days' absence. His practice extended from Kinzue and Corydon, in Pennsylvania, on

the South, to Collins, in Erie County, N. Y., North; among Indians as well as whites was he called to visit the sick.

A doctor's life, in its best phase, is one not to be envied; but to one, like the venerable subject of this notice, who has performed laborious pioneer service, his memory, at least, should be held in grateful remembrance. Doubtless the doctor's genial humor, and his inexhaustible fund of wit and anecdote, often served to alleviate (if not the antidote) the patient's sufferings.

Dr. LEAVENWORTH, as a physician, was often called to the performance of difficult cases of surgery, which, at the present day, with the improved surgical instruments now in use, could be more easily accomplished. A case of importance, (and the first one ever performed in the county,) was related to the writer of this notice, that required the amputation of a limb of a middle-aged Indian, residing upon the Alleghany Reservation, which at once shows the ready resources of the doctor, and the unflinching nerve of his counseling friend and assistant in the operation, JOHN GREEN, Esq.

The Indian had suffered for several years with a lame knee, that finally became so dangerous as to threaten his life; when his condition became known to the Quakers residing at the Quaker Mission, near the southern end of the Reservation, these benevolent Friends applied to Dr. LEAVENWORTH for medical advice, who, upon examination, decided that amputation was absolutely necessary to save his life. Accordingly the doctor made (from necessity) his surgical instruments from a carpenter's chest of tools, and the following day, assisted by JOHN GREEN, Esq., and another resident of Great Valley, amputated the poor Indian's leg. As the doctor began his work, the latter assistant *fainted*. GREEN made a brisk application of sole leather upon his nether person, and he speedily revived and left, when the doctor, assisted by GREEN, successfully accomplished the painful task, and the Indian so far regained his health and strength as to live to a good old age.

A friend relates a good anecdote of the doctor, that shows self-reliance on his part, as well as it illustrates the old saw, that "in a multitude of doctors there is danger." The doctor was taken suddenly and violently sick, and of course other doctors volunteered their offices; but the doctor sent for his old personal and valued friend, SAMUEL EWING, Esq., to whom he stated his case, prepared a written "prescription," and told him that, from the nature and situation of his disease, he feared that he might become deranged; "but," said the doctor, "let

the disease run as it may, I charge you to follow my prescription to the letter, and at all events *keep the doctors away!*"

Besides his multifarious cures as a physician, Judge LEAVENWORTH has held various public offices, and served his fellow citizens in any capacity where they deemed his services useful. On the 25th of January, 1823, he was appointed First Judge of the County Courts of Cattaraugus County, which office he continued to hold until February 15, 1833, when he was succeeded by Hon. BENJAMIN CHAMBERLAIN. Although not educated to the bar, and having but slight knowledge of law as a science, he brought to the performance of his duties a large fund of common sense, an intuitive perception of legal principles, and a deep appreciation of the equitable obligations and duties of the citizen in all his varied relations. With an integrity above suspicion, and beyond the reach of all extraneous influences, he held the scales of justice with an even hand, and parties and suitors in his Court seldom had occasion to appeal from his decisions, or complain of his administration of the law. His intercourse with the bar was always pleasant and familiar, and while he presided in his Court with a spirit of kindness, and a familiar and unrestrained bearing and manner, the innate integrity and dignity of his character was reflected upon his office, and commanded the respect of all who had occasion to appear before him in his official character.

He has also held the office of Supervisor of the towns of Coldspring and New Albion; a Commissioner to superintend the erection of the County buildings at Ellicottville; Commissioner of Loans; and a Commissioner to lay out public roads on the Indian Reservation, and various other positions, of which we have no data. In all these various public trusts he has maintained a course of sterling honesty that has never been impeached, and we are not aware that a charge of official delinquency of any sort has ever been made against him. He has brought to the discharge of official trusts the same principles of action that governed his conduct in private life, and has ever acted upon the rule, that dishonesty and craft, in political affairs and public stations, was no more to be tolerated than knavery in affairs of business, or his social relations.

Judge LEAVENWORTH has participated to a considerable extent in the public enterprises of the county. We may mention with propriety his exertions in procuring from the Holland Land Company a reduction on the price of the lands, and an entire surrender of the accumulated

John C. Smith

Published by John Manley Little Valley N.Y. 1857

interest on land contracts, held by the Company against the early settlers. This measure was of vast importance to the settlers, and gave an immediate impulse to the population of the county, a fact probably not well understood now, but was and is appreciated by the pioneers of the county. The Judge was one of the original projectors of, and a liberal contributor to the fund for the erection of the RANDOLPH ACADEMY.

Judge LEAVENWORTH, by diligence, liberal economy, and judicious investments, is in possession of a competency; and long may he live to enjoy the fruits of his well-filled cornucopia! Whoever has traveled on the New York and Erie Railroad, has, of course, as the cars swept around the crescent at Cattaraugus Station, noticed the elegant brick mansion resting on the southern edge of a hundred acres of table land, forming the handsomest plateau on the line of the road. That is the homestead of Judge LEAVENWORTH; there he enjoys life, pets his fine herd, hospitably entertains his friends; can tell many a pleasant anecdote of the early pioneer life in the county; and there, as elsewhere, in his green old age, perhaps no man in the county is more sincerely esteemed.

STALEY NICHOLS CLARKE.

The real value to society of an individual member consists not so much in his exhibition of those shining powers of intellect which compel our admiration, as in the daily manifestation of those more attractive qualities of heart which win our confidence and love. Great abilities assuredly have their uses, and when their destiny is properly unfolded, the world is a gainer by their existence, and a loser by their decay. But the virtues of charity, largeness of soul, and an ever-actuating sympathy for and with one's kind, are essential elements in every pleasure. The great die and are buried. The good are buried but never die, for their souls are so inwrought into the lives of those around them, that the aggregate existence of the community is, to some extent, a continuous and permanent embodiment of their character. Their names may not live upon the lips of men, but the actual effects

of their influence and example descend from generation to generation, a precious and perpetual inheritance of strenuous, but unobtrusive virtue.

The man, therefore, who unites goodness of heart with intellectual ability, has a claim upon our esteem while living, and upon our affectionate remembrance when dead, which, for the honor of our race, we should never disregard. It is a worthy, and should be a pleasurable task, for each to contribute his share, however slight, towards a proper recognition of the value of such a character. It is with a feeling akin to this, that the present sketch of one more thoroughly identified than any other with the history and prosperity of our county, is undertaken.

STALEY NICHOLS CLARKE was born in Prince George's County, in the State of Maryland, on the 29th day of May, 1794. At the age of twenty-one he emigrated to Western New York, and began his career in life as a clerk in the Bank of Niagara, at Buffalo. In 1819 Mr. CLARKE removed to Batavia, where he was employed as a clerk in the office of the Holland Land Company until January, 1822, when he took charge of the office of the Company at Ellicottville as their agent.

The County of Cattaraugus was then a comparative wilderness, whose aboriginal beauty of hill and valley, of heavy forest and unobstructed water-courses, had suffered but little waste from the hands of men. Olean, from its situation on the Alleghany River, was even then a place of considerable consequence. The surface of the county was dotted here and there with an occasional clearing, but in general nature reigned in undisputed sway. Even Ellicottville was closely environed by forests; it was a mere island in an ocean of verdure.

The settlers were necessarily poor. Like all who immigrate to unsettled territory, they came, to a great extent, destitute, either driven by necessity or impelled by enterprise. With no capital, but stout hearts and hands willing to toil, it was no light task to grapple at once with the exigencies of debt and the stern hardships of backwoods life. Separated by an almost impassable distance from home and birth-place, in the heart of a wilderness, invulnerable to aught but endless toil; cut off from all but occasional communication with the friends they had left behind, and provided with but scanty means to meet an accumulating indebtedness, it would not have been surprising if even their iron nerves had yielded to the crushing burden of their lot, and repudiated the ungrateful task of redeeming an unwilling soil. But they were not

the men to repine or succumb. Their work was before them, and they did it well. To their spirit amidst discouragements, to their hope amidst reverses, to their fortitude in trial, to their determined and persistent energy at all times, we, whose comforts are the fruits of their privations—whose labors are lightened by their toil—whose possessions are enriched by their exertions, are under an obligation which we do not appreciate, and cannot discharge.

To these hardy pioneers the advent of Mr. CLARKE was an inestimable blessing. Their scanty crops, wrung with strenuous and painful effort from a reluctant soil, barely sufficed to meet their immediate wants, and afforded but meagre encouragement of means for liquidating the claim of the landlord. In him, however, their embarrassments found a ready appreciation. Gifted with that true generosity of heart which constitutes the only genuine nobility, those in need of kindness and indulgence met from him not the oppression of the task-master, but the sympathy and encouragement of a friend. His fidelity to those who employed him was scrupulous and unquestioned; but to lend a willing ear and a helping hand to the appeal made by penury and distress he has ever regarded as a duty paramount to all, and imposed upon him by the very fact of his manhood. Those who have experienced kindness at his hands, and their name is legion, will bear testimony to the assertion that in no case of actual need was an application for lenity or kindness ever made in vain. Many of these objects of his beneficence are now living, rich in the enjoyment of this world's goods, in herds of cattle and acres of cultivated land, but neither age nor prosperity has dimmed their gratitude for the kindness he has shown them in their hour of need.

The confidence and affection with which he was regarded led to his election as County Treasurer in 1824, an office which he continued to fill through a period of seventeen years. In November, 1840, he was elected to Congress, where he served his constituents during his term of office. Since then he has filled no public place. Though deeply interested in all that concerns the welfare of the country, he has no craving for the stormy and unsubstantial excitement of political warfare, and readily yielded his place to more ambitious men.

Mr. CLARKE was married in October, 1816, and has raised a family of eleven children. Sorrow and death, from whose melancholy visitation none are exempt, have cast their unwelcome shadows across his threshold. His estimable wife, with whom time has dealt so tenderly

that but few of its footprints are left to mark its passage, with vigor undiminished and faculties unimpaired, still lives, the stay and companion of his declining years. For forty years they have traveled on through life together. They have seen the young grow old, and children ripen into maturity around them. They have lived to witness changes, such as in an earlier age men would have called miracles, and ascribed to the gods. They have seen a wilderness transformed from a luxuriant waste, and made to bloom and blossom as the rose. They have beheld villages shooting up around them into flourishing centres of enterprise and intelligence. And more than all, they have lived in an abundant experience of the daily blessings which acts of sympathy and kindness, even in this world, shower upon him who performs them.

For him who has thus lived, the future can have no terrors. Happy in the enjoyment of his family, in the consciousness of not having lived in vain, and in the affectionate regard in which all hold him, it would be strange indeed if old age were not to him the sunny side of existence; and there are none who will not join in the expression of a prayer that his life may be long preserved, as fruitful a source of unclouded enjoyment to himself as it has proved prolific of benefit and happiness to others.

FRANCIS SMITH EDWARDS.

It is given to but few men to attain high position in social and political life before reaching the meridian of manhood. The history of Mr. EDWARDS furnishes one of these few instances, where public confidence and favor are promptly bestowed in appreciation of merit.

Mr. EDWARDS was the second son of JOSEPH and ABIGAIL EDWARDS, and born at Norwich, in the State of Connecticut, May 28, 1818; and is consequently now in the fortieth year of his age. He originates from families strongly imbued with heroic patriotism. His grandfather on the maternal side was Captain SAMUEL BUEL, an active and prominent hero of the Revolution. His grandfather on the paternal side was also a soldier of the Revolution, and likewise engaged in the public

F. S. Edwards,

Published by John Wanley Little Valley N.Y. 1857

service in the French War, having been present at the taking of Quebec, and assisted in carrying from the field the gallant dying General WOLFE.

The father of our subject, who was a farmer by occupation, emigrated from Connecticut while the latter was an infant, and settled at Windsor, Broome County, N. Y., where he engaged in the lumbering business, and prosecuted it extensively about five years, after which he removed to North Norwich, Chenango County, and purchased a farm of two hundred acres, on which he resided about twenty years, and then removed to Wisconsin, where he died in the year 1852. The son lived under the paternal roof until 1834, having been meanwhile a diligent student with books in and out of school, save while assisting his father in the labors of the farm. At this period, at the age of sixteen, young EDWARDS entered the Hamilton Seminary, now Hamilton University, at Hamilton, where he remained three years in close study of the English branches and the classics.

In the spring of 1837, he commenced the study of the law in the office of Messrs. WAIR and COOK, at Norwich, the former a distinguished member of the bar in that section of the State. After a thorough study of three years, he was admitted to practice in all the various courts of the State, at the May Term of the Supreme Court in the City of New York, when an examination, memorable for its rigid severity of trial, was had under the express injunctions of the Chief Justice presiding, who appointed for examiners the following distinguished men, then or thereafter known as Judges STRONG, of Tioga, EDWARDS, of New York, and Hon. Mr. KIRKLAND, of Utica. It is sufficient to say, to show how thorough and unrelaxing was this examination, that but twenty of the class of seventy proposed passed successfully through this ordeal, which occupied eleven hours in sittings continued two days.

Thus honorably passed upon, Mr. EDWARDS immediately opened a law office at Sherburne, Chenango County, where he prosecuted a successful business for the term of four years. Meanwhile, he was twice elected to the office of Justice of the Peace. So satisfactorily had he discharged the duties of the office during the first term, that on the latter occasion he succeeded as the only candidate on his ticket. It was while residing here also, that he entered the matrimonial state, and in October, 1840, was married to Miss JULIA S. WHITE, (daughter of the late SQUIRE WHITE, M. D., of Fredonia,) by whom he subse-

quently had two children. In 1841, he was appointed a Master in Chancery for the County of Chenango, by nomination of Governor SEWARD and confirmation of the Senate, and held the office till his removal from the county.

In the autumn of 1844, Mr. EDWARDS removed to the City of Albany, where he entered upon an extensive practice in his profession, in connection with his brother-in-law, WM. D. WHITE, Esq. He remained in Albany until April, 1851, when he removed to Fredonia, (the native home of his wife, and the place of residence of her father and numerous kindred,) and commenced practice in his profession in company with Messrs. P. S. COTTLE and S. SNOW. In this firm he continued one year, when the partnership was changed to COTTLE & EDWARDS, and so continued, extensively patronised, until November, 1855. In 1852, Mr. EDWARDS was elected on the Whig ticket, to which he was unanimously nominated, as Special Surrogate of the County of Chautauque, for the term of three years. The duties of this office, apart from those when acting as substitute for the Surrogate, are the same as those devolved upon the Justices of the Supreme Court and County Judge at Chambers, and it is proper to say, that they were discharged with fidelity by him during his term.

From early life, Mr. EDWARDS has been an ardent politician, in the original sense of the term before becoming charged with derogatory signification. He early embraced the doctrines of the Whig party, as taught by CLAY and WEBSTER, and always acted in sympathy with the conservative Whigs, until the commencement of the American movement, which at once enlisted his sympathies and secured his bold and efficient advocacy, as it did the approbation and support of the conservative Whigs generally throughout the Union. Without going into a history of the canvass for member of Congress in his district (composed of Cattaraugus and Chautauque) during the fall of 1854, full of events complicating that interesting and exciting contest, it is sufficient to say, that Mr. EDWARDS was nominated as a candidate by the American party, acting independently, in a secret convention held at Dunkirk, on the Wednesday evening preceding the election; that he was present at that convention, and twice declined the nomination, but on the third tender of the position, accepted it only under a view of the necessity which required an exposed champion and leader for the new party, who in the then aspect of the canvass was in all probability to be made a martyr by the other parties, leaving scarce a

hope of the alternative result of coming out a successful hero; and that, contrary to all expectation, until the blunders of the combined opposition had opened the matter to doubt on the day preceeding the election, he was elected by a heavy majority over all others.

Mr. EDWARDS took his seat in the United States House of Representatives in December, 1855. The first session of the Thirty-fourth Congress, to which he had been thus elected on the American issues, was made, by what he and his political friends regarded unnatural diversions of one sort or another, one of the most exciting and painfully interesting in the history of the Government; and the second was little behind the first in attracting the anxious attention of the people, save that the novelties of a bitter sectional agitation had then become ordinary appearances, and the public mind was turning toward the ensuing Presidential election.

The first Session was made memorable by the tedious and exciting contest for the Speakership. It was during this contest, which, to a certain extent, was unfairly made a struggle between the two sections of the country nominally dividing on Mason & Dixon's line, but really separating and subdividing without reference to geographical lines, on other bases, that the course of Mr. EDWARDS became of great embarrassment. Himself altogether opposed to sectional agitation of whatever origin, and bent on giving prominence on all occasions to the questions on which he was elected, it was not strange that he should favor, during several weeks of contest, the election of some Northern man not so closely identified with sectionalism as was Mr. BANKS, and that he should afterward, on coming to the conclusion that the organization of the House could be secured in no other way, give his support to Mr. BANKS, for that end, and for the reason, also, that Mr. BANKS solemnly pledged himself to the maintenance of American Principles.

In all his votes on the ballots for Speaker, on the Whitfield contested election case, on the Topeka Constitution, and the restricting section in the Appropriation Bills, and in all matters of similar character, Mr. EDWARDS deferred to what appeared to be the will of his constituents, inasmuch as he felt it to be the duty of the Representative to truly reflect the views and feelings of the people of his district in his official conduct, though it might sometimes require the sacrifice of his own personal opinions. In his speeches he also endeavored to give

to the House and the country a faithful expression of the sentiments and wishes prevailing at the time among his constituency.

The same rule of conduct, imposing obedience to popular will when definitely expressed, was permitted to govern him in all his action at the Second Session. It is unnecessary to go into detail as to his votes or speeches on different subjects. It is believed that all of the important votes given by him were satisfactory to the great majority of his constituents, and that his speeches truly reflected their sentiments. The illness of his wife, which commenced soon after the first assumption of his Congressional duties, and, ere long, signified the slow, but certain fate of the consumptive, served to distract his mind, and embarrass him in the performance of his official labors. It was while absent from Washington, on a visit to the beloved partner of his bosom, an idol of his early and constant manly worship, wasting away without the most distant expectation of recovery to tempt to resort to the consolations of hopeful anticipations, that some important votes in Congress were taken. This cloud, dark with impending calamity the most distressing man can feel, hung over him throughout the first Session. It finally burst upon him soon after the adjournment. Mrs. EDWARDS expired on the 14th September of that year—1856.

Just before the close of the Thirty-Fourth Congress, to which Mr. EDWARDS was elected, he resigned his seat. He felt that it was alike due to himself and his constituents, that he should take this step. He knew, better than all others, that he had been unjustly charged with corrupt conduct in reference to the bill granting Public Lands to aid in constructing Railroads in the Territory of Minnesota; that he had been most unfairly tried before a secret inquisition; and that he could not re-open that trial before the House, which, notwithstanding, was to pass upon his case summarily, with party and personal interests, without any future responsibilities to restrain their conduct thereon, also combined with an ex-parte attack against him. It is very proper here to say, that while the bill in question was represented to be tainted with corruption, it passed the Senate nearly unanimously, and also through the House, where it received the votes of at least two of the Corruption Investigating Committee, by a very heavy majority, *after the whole affair had been gone through with.*

It is due to Mr. EDWARDS also to say, that he has in his possession a document, signed by one hundred and sixty-nine fellow Representa-

A. E. Gordon

Published by John Wiley, Little Valley, N.Y. 1857

tives, not only testifying to his honorable conduct generally, in and out of the House, *but solemnly declaring their belief of his entire innocence of all the charges brought against him.* This triumphant acquittal by the House itself in one sense, as it includes the signatures, in the proper hand of each member, of more than two-thirds of that body, is but a just award, while it is a most gratifying result to himself and his district.

It is but just to say further of Mr. EDWARDS, that he has made a deep impression on his district, in moulding popular sentiment on the great questions of the day. He has written much and spoken more that will serve to influence political action throughout his district for a long time to come, and be attended, as his friends believe, with very salutary results.

REUBEN EATON FENTON.

The subject of the present memoir, Hon. REUBEN EATON FENTON, was born in what now is the town of Carroll, County of Chautauque, and State of New York, on the 4th day of July, 1819, and is now thirty-eight years of age. His early years did not develope any very striking peculiarities, if we except his strong desire and constant endeavor to excel his associates while attending the common school, at which institution he received the greater part of those business qualifications and that practical education which has rendered him successful in all the active transactions of his after-life.

He, like most other boys, the sons of the hardy pioneers of Western New York, endured many hardships and privations, spending the most of his time till he was fifteen years of age, except a few months in the year while attending the winter schools, at hard work upon his father's farm.

In the years of 1834-5 he attended, in its incipient state, "College Hill Academy," an institution that has since expanded into the "Farmer's College," one of the first institutions of learning in Ohio. His progress and proficiency while at "College Hill," or "Pleasant Hill," as it was then called, were such as to receive from his teachers the

highest encomiums. Leaving "Pleasant Hill," he spent a brief period in the year 1836 or 1837 at the "Fredonia Academy," in his native county, but his health failing, he left this institution. This constitutes the whole of his educational privileges.

Mr. FENTON early evinced more than an ordinary penchant to mingle in the exciting scenes of the political arena, and at the village club or evening debate was usually a successful speaker, and while quite young discovered much speaking talent. Regaining his health somewhat, he entered in 1838 the law office of JOSEPH and FRANKLIN H. WAITE, Esqrs., in the village of Jamestown, and remained for nearly a year; more, however, with a view of becoming qualified for those active business transactions in which he was about to engage, and becoming familiar with those principles and forms of law with which every business man should acquaint himself, than with any intention of pursuing the profession of law as an occupation.

In the year 1840 he commenced those successful operations in the lumber trade which have since rendered his name a household word among lumbermen, from the head-waters of the Allegany to the mouth of the Ohio; having also engaged, the year previous, in the mercantile business in the village of Frewsburg, in Chautauque County, being then twenty years of age. No memorandum of the active and eventful life of Col. FENTON could be complete, without an allusion to his extensive and uniformly successful transactions in this branch of his business.

Commencing, as we have said, in 1840 on a small scale, and owing to the failure and inability to assist him of those on whom under other circumstances he might have leaned for aid, with a very small capital he has gradually extended and enlarged his operations, until he is now numbered among the most extensive lumber dealers whose rich and valuable products float annually down the endless maze of our beautiful Western rivers. His uniform and we may say *never-failing* success has become proverbial with lumbermen; it has been by them attributed to his "good luck." It is often facetiously remarked that "it is *impossible* for his property to be injured, because he is so lucky."

This, however, is not the secret of his success, either in business or in the political arena. One of the principal characteristics of Mr. FENTON's career is *untiring sleepless vigilance* and *personal* attention to all the details of his business; never trusting anything to others that it is possible to do himself, and never putting off till to-morrow what ought to be done to-day. This personal care and superintendence of his

affairs, and promptness to execute at the right time, more than any favoritism of dame fortune, is the cause of his uniform success in business and politics so far in life.

In 1843, being then twenty-four years of age, he was elected with much unanimity Supervisor of the town of Carroll, in Chautauque County, and remained for the eight succeeding years a member of that body, and for three of those years was chosen Chairman of that Board. This fact, at a time when Chautauque was strongly adverse to the political party to which Mr. FENTON had attached himself, gave early evidence of that growing popularity with the people that has since enabled him to measure swords successfully with some of the oldest veterans among his political opponents in the Thirty-third Congressional District. His course as a County Legislator was marked with much ability, there developing those qualifications which afterwards rendered him distinguished in the National Legislature.

In 1849, Col. FENTON received the nomination for Assembly in the Eastern District of Chautauque, by the Democratic party, against the Whig candidate, Maj. SAMUEL BARRETT, of Jamestown. The Whig majority in that county and district was then strong, Chautauque at that time being the banner Whig County in the State. The contest was close and animated. Mr. FENTON was beaten in the district by only 21 votes, many of his friends claiming that if the canvass had been perfectly fair, he would have distanced his competitor. Be that as it may, the result broke that prestige of success that had for years rendered the Whig party invincible in Chautauque.

The Democratic party of his Congressional district, becoming satisfied that, added to his other qualifications, he possessed that of *running well*, in 1850 gave him the nomination for Congress, in opposition to Hon. F. S. MARTIN, of Olean. This nomination Mr. FENTON declined, Hon. F. H. WAITE, of Jamestown, being substituted.

In 1852, Col. FENTON received and accepted from the Democratic party the nomination for Congress against Hon. G. A. S. CROOKER, of Cattaraugus. This was a very exciting canvass. Mr. CROOKER was a Whig lawyer, possessed of brilliant speaking talents, which he exerted to the utmost. In a district so strongly Whig in politics, it seemed a wild adventure for a young man, a leading Democrat, to enter the lists, with any prospect of success; but Mr. FENTON entered the canvass with his usual vigilance and laborious determination to succeed, with entire confidence that he should come out triumphant. After one

of the hardest contested battles ever fought in the district, Mr. FENTON was declared elected with an *official* majority of 56 votes.

With the career of Col. FENTON, in the famous Thirty-third Congress, all are familiar. Elected as a Democrat, with known Free Soil tendencies, and equally well known Free Soil antecedents, he entered that Congress an ardent and enthusiastic supporter of the Administration of FRANKLIN PIERCE, under the solemn assurance from the National Convention of that party, that assembled at Baltimore in 1852, that the "subject of Slavery should not be agitated in Congress or out of Congress," and by the equally strong pledges of non-agitation by the Democratic party in Mr. PIERCE's Inaugural Message.

But he had not long held a seat in that body before it became apparent that a submission to *new* demands of the slave power, involving no less a sacrifice than the repeal of the Missouri Compromise, that ancient and honorable barrier to the northwardly spread of African Slavery, was to become a *test* of Democratic church-membership. The Nebraska Bill was very soon introduced into that Congress, and was at once adopted by the President, as a leading measure of his administration; and it was of course supported by all who desired or expected to retain their position in the party.

At this juncture, Col. FENTON, though enjoying to a flattering degree the confidence and esteem of the President and his Cabinet, broke away from his life-long associations, and ardently espoused the cause of Freedom, which had been jeopardized by what he believed to be the unfaithful course of the administration. During the remainder of his term in Congress with Senators FOOTE and SEWARD, PRESTON KING, CHARLES HUGHES, DANIEL MACE, N. P. BANKS, and many others, he became a leading spirit in the formation of the Republican party.

His untiring assiduities and attention to their wants, and the business intrusted to his care by his constituents, at once placed him in the front rank of the working members of that Congress. He received a place upon the Committee on Commerce, at that time second to no other, save perhaps the Committee of Ways and Means, in the importance of its duties. His efficient labors on that Committee gave him at once a prominent position before the country, and he received many well-deserved compliments for his tact and laborious attention to all the details of their duties.

This Committee reported the bills to the House of Representatives, which carried into successful operation the celebrated "Reciprocity

Treaty" with the Canadian Government, by which the area of free trade and commerce has been extended over nearly the entire North American Continent. Mr. FENTON was very successful in his efforts to procure the just demands of the old soldiers and their widows for pensions, bounty lands, &c. His speeches in Congress on the Nebraska Bill—in opposition to the bill of Mr. OLDS, to change and increase the Rates of Postage—in favor of River and Harbor Improvements—and in favor of the bill to Extend Invalid Pensions, were all able efforts, and were almost universally endorsed by his constituents. His eloquent and fearless speech against the Nebraska Bill, in which he had occasion to measure weapons with Gov. SMITH, of Virginia, was one of the first demonstrations that was made by a Northern Democrat against that measure.

In the fall of 1854, a successor to Mr. FENTON was to be chosen; he had come to the conclusion only in a certain event, dependant upon the action of the Whig Congressional Convention, to become a candidate for re-election. It was very uncertain who would receive the nomination of the Whig Convention. In the event of their nomination of one who had been Mr. FENTON's most bitter opposer, and who was considered their strongest man, he had given his friends assurance that he would again enter the canvass and try titles with his rival. The action of the Democratic Convention was delayed for several weeks while the Whigs were deliberating upon a candidate.

They at length succeeded in nominating Hon. G. W. PATTERSON, of Chautauque. The Democratic Convention then assembled and nominated Col. FENTON by acclamation. This nomination he declined; his business, which had been neglected, demanded his personal attention; besides, the politics of the district was not then so much Whig and Democratic as it was Nebraska and Anti-Nebraska, and the nomination of Mr. PATTERSON, a reliable Anti-Nebraska man, had removed the only inducement to Mr. FENTON to again enter a political canvass.

The Democratic Convention then put in nomination Hon. W. P. ANGEL, of Ellicottville; thus the Anti-Nebraska party seemed sure of a member in any event. But it was during this campaign the wild storm of Americanism burst upon this section of the State, and swept with irresistible fury over this district.

Before the election, it became apparent that this secret Order did not intend to support either of the then nominees for Congress, and it was also apparent that they held within their organization a majority

over either the Democratic or Whig parties. Two days before the election some of the leading friends of each of the nominees held a consultation, and came to the conclusion that their only hope of success against the war of Americanism that was sweeping past, lay in the withdrawal of both the Whig and Democratic candidates, and a union upon some new candidate.

Mr. FENTON, at that late hour in the canvass, much against his judgment and advice, reluctantly consented to enter the fight as the "People's Candidate," against Hon. F. S. EDWARDS, who had been nominated in secret, by the Americans. There being but two nights and one day in which to work before election, and a cold drizzling rain setting in and continuing during the whole time, the people, being but half informed of the causes of the change of candidates, became confused and suspicious, and went over by scores to the Americans; the result, as might have been expected, was disastrous, Mr. EDWARDS beating him some fourteen hundred votes.

But this defeat, instead of weakening his popularity with the masses, seemed only to strengthen him. He remained unscathed amid the seeming ruin. Though defeated by one of those uncontrollable and unaccountable risings of the masses that will at times sweep over a country controlled by the popular suffrages of the people, to redress real or imaginary wrongs—still, though he received the blow, it was evident it was not aimed at him, but the people of his district hastened with alacrity to bind up the wounds which they could not avoid inflicting.

Two years had not elapsed, ere it was evident that with singular unanimity the popular mind pointed to him as Mr. EDWARDS' successor. Mr. FENTON did not, as his enemies expected, sink under the blow, or curse the hand that dealt it.

In the summer of 1856, the Presidential canvass opened with great bitterness and excitement. Col. FENTON had been a delegate to the National Pittsburgh Convention, that was presided over by FRANCIS P. BLAIR, and was also a delegate to and member of the National Republican Convention, that assembled at Philadelphia, on the 17th of June in that year, and which put in nomination for the Presidency, Col. JOHN C. FREMONT.

He participated actively in that exciting and memorable contest. He was himself unanimously nominated in September by the Republican Congressional Convention. He was opposed again by Hon. F. S.

EDWARDS, as the American, and Hon. C. J. ALLEN, as the Democratic candidates for the same office. Never was a fiercer battle fought in the old Thirty-third District. The canvass was exceedingly bitter and virulent on the part of the Americans; particularly against Mr. FENTON in Chautauque County. But he came out of the canvass bearing upon his shoulders the unprecedented majority over Mr. EDWARDS of eight thousand six hundred and ten, and a majority over both competitors of over five thousand.

During all these political conflicts, the fiercest and among the most memorable in the political history of the State, and the formation of new organizations, which resulted in the association together of those who had once been politically opposed—"the gain of enemies and the loss of friends"—his feelings were never so embittered as to prevent those polite interchanges of gentlemanly intercourse and regard with the most bitter and virulent of his opponents; this, too, perhaps, when his presence to them was almost intolerable, while he, perfectly cognizant of this fact, could address them with the most affable smile, as if their mutual relations had never been distrusted or out of harmony.

It requires no affectation on his part to thus deport himself; it is the impress of an open and frank disposition and a natural generosity of bearing; a consciousness of his own strength and the justice of the cause he espouses, and the rectitude of his acts. And while he is not averse to an honorable subjugation of his enemies or opponents, no one perhaps is more magnanimous and generous in his triumphs.

As Mr. FENTON'S *political* life has been by far the most eventful and stirring, we have dwelt at greater length upon that portion of his career. But neither the extensive business operations that have engaged his attention, or the exciting political scenes through which he has passed, have precluded him from devoting a share of his time to the more quiet and peaceful avocation of literary and agricultural research.

The noble science of agriculture has engaged much of his time during the hours of relaxation from business, and those who have heard or read his agricultural addresses—finished literary productions—will not fail to perceive that this ennobling art has engrossed a due share of his attention and study.

Of his benevolence as a private citizen, and his many acts of personal and public liberality, we may with propriety pass over in silence; they will form a more fitting theme of comment and future sketch when the subject of them shall have passed from active life.

Col. FENTON is still in the prime of life and in the noon-tide of his usefulness. He has a fine figure, a commanding appearance; as a public speaker he is fluent, extemporaneous, effective, and often eloquent; and were it not for the small compass of his voice, would always be listened to with riveted attention, whether addressing a select audience in the lecture room or the excited swaying masses of an out-door political assembly.

We know not that he has any aspirations for further political preferment; but if he acts wisely, honestly, and fearlessly in the great struggles through which he is to pass in the present Congress, taking the dictates of conscience, the admonitions of enlightened humanity, and the demands of the mass of the people composing his constituency as his guide, we can but predict for him a more brilliant and exalted future than has been his past.

CIVIL LIST OF CATTARAUGUS COUNTY.

Cattaraugus County was, by an Act of the Legislature of New York, passed March 11, 1803, taken from the territory of the then County of Genesee, and erected into an independent county, with its boundaries fixed as they exist at the present time; but its political organization was not effected until March 28, 1817. Prior to the latter date, the west part of the county was attached to Niagara, and the east part to Allegany County, for judicial purposes.

Hon. TIMOTHY H. PORTER, *First Judge*, and Hon's FRANCIS GREEN, ASHBEL FREEMAN, JAMES BROOKS, and WILLIAM PRICE, *Associate Judges*, constituted the " Court of Common Pleas and General Sessions of the Peace," for the County of Cattaraugus. The first Court was held in Olean, in July, 1817, in pursuance of the following order :

WHEREAS, an Act of the Legislature of the State of New York, for organizing the County of Cattaraugus, passed March 28th, 1817, has made it a duty of the Judges for the time being to appoint a place for holding the Courts of Common Pleas and General Sessions of the Peace, in and for said county:

Therefore, we, FRANCIS GREEN, ASHBEL FREEMAN, and JAMES BROOKS, Judges of the Court of Common Pleas, in and for the county aforesaid, convened at the house of WILLIAM BAKER, in the town of Olean, in the county aforesaid, have

(conformably to the Act above mentioned) appointed, and by these presents do appoint and declare, the house of WILLIAM BAKER, in the said town of Olean, in the county aforesaid, to be the place for holding the first Court of Common Pleas and General Sessions of the Peace, in and for the County of Cattaraugus.

IN WITNESS WHEREOF, we have hereunto set our hands this 5th day of June, 1817.

(Signed,)

FRANCIS GREEN,
ASHBEL FREEMAN,
JAMES BROOKS.

ISRAEL CURTIS was the first Sheriff, with BENJAMIN CHAMBERLAIN for his Deputy; SANDS BOUTON, County Clerk; JEREMY WOOSTER, Surrogate; and SYLVENUS RUSSELL, County Treasurer.

The first deed was recorded on the 3d day of July, 1817, which was a Sheriff's deed, from the Sheriff of Allegany County, to BENJAMIN CHAMBERLAIN.

The offices of first FIRST JUDGE, 1817—first STATE SENATOR, 1823—first DISTRICT ATTORNEY, 1824—and the first MEMBER OF CONGRESS, 1825–27, selected from Cattaraugus County, were successively held by the late Hon. TIMOTHY H. PORTER, of Olean, who had previously, in 1816 and 1817, represented the Counties of Allegany and Steuben, and subsequently, in 1838 and 1840, this county in the State Assembly; all of which honorable positions were filled with ability and to the public acceptance; and it is a matter of public regret that no portrait exists of that distinguished man, who was so largely connected with the early history of the county.

“The Courts were first held in Ellicottville, in July, 1818, at the house of BAKER LEONARD; that house and the Holland Land Company's Office were all the dwellings then erected in that place. A Court House and Jail, in one building, was built soon after; this burnt down in the winter of 1829, and the present Court House and Jail were built the same year.”—*Judge Martin*.

FIRST JUDGES—COUNTY COURTS.

Timothy H. Porter,	March, 28, 1817.	Benjamin Chamberlain, . . .	Feb. 15, 1833.

GOVERNORS OF NEW YORK.

The Executive power in New York, while a colony, was vested in a Governor and council of twelve members, appointed at will, by the king, who issued instructions for their guidance, extended to every common contingency, changeable at the royal pleasure, but seldom materially altered.

At the beginning of the Revolution, the salary of the Governor was £1,500 currency, and perquisites amounting to as much more.¹

From 1717 to 1822 the Governor was elected triennially. He was a member of the council of revision and president of the council of appointment. Under the late and present Constitution the Governor is elected biennially. He is commander-in-chief of the military and naval forces of the State; may convene the Legislature, or Senate only, on emergencies,² and possesses the pardoning power.³

His qualifications and general duties are defined by the Constitution,⁴ and he receives a salary of \$4,000 per annum.

He recommends to the Senate the appointment of officers hereinafter mentioned, and appoints commissioners of deeds in

¹ Smith's History of New York, Historical Society's edition, volume 1, page 361.

² Until 1821 the Governor might prorogue the Legislature from time to time, not exceeding sixty days in a year.

³ Under the first Constitution, this extended, in cases of murder and treason, to a respite until the next session of the Legislature only, when the latter might pardon, commute, or direct the execution of sentence. In treason and cases of impeachment, he is still thus limited.

⁴ Article 4, sections 1 to 5.

other states, notaries public, and such other officers as are from time to time directed by special Acts; he fills most of the vacancies occurring in office (excepting assemblymen, state senators and congressmen,) until a regular election or appointment can be made, and may remove, under limitations prescribed by statute,¹ most State and County officers.²

He communicates to the Legislature at the beginning of each session, and from time to time by message, a statement of the financial condition of the State, and recommends such measures as he may deem expedient. He is charged with the general execution of the laws, and may adopt such measures for enforcing them as emergencies may warrant. In case of vacancy his place is filled by the lieutenant-governor, or the president of the senate.

The term of office of the Governor, and of all other officers not expressly excepted by law, begins with the civil year next after their election.

The civil and political year formerly commenced on the first day of July,³ but is now defined by the Constitution to begin on the first day of January.⁴

¹ No record of the votes at these elections exists in the Secretary's office; they were taken *via voce*, and were nearly unanimous.

² The votes of Clinton, Otsego, and Tioga Counties were not canvassed. The reason of this is recorded in the Secretary's office, Deeds, xxiv., p. 249.

³ John Tayler acted as Governor from February — to July 1, 1817.

⁴ Nathaniel Pitcher acted as Governor from the death of Clinton, February 11, 1828, until the expiration of the term.

⁵ Resigned March 12, 1829. Enos T. Throop acted as Governor till the expiration of the term.

Of the Governors of this State, Martin Van Buren has been President of the United States; George Clinton, Daniel D. Tompkins, and Martin Van Buren have been Vice-Presidents; De Witt Clinton, Martin Van Buren, William L. Marcy, William H. Seward, and Hamilton Fish have been United States Senators.

Towns, their Post Offices, Statistics, and Advertisements.

OLEAN,

The first town organized in the county, was incorporated March 11, 1808, the date of the Act erecting the county, and embraced the entire territory of the county. In 1855 Olean contained 1,611 inhabitants, with 307 native and 21 naturalized voters; had 280 cows, from which were made 5,310 pounds of butter and 560 pounds of cheese; contains 21,847 acres of land, of the assessed value of \$282,464. Taxes in 1856, \$1,688.53.

The OLEAN ACADEMY, an excellent institution, is located in the village of Olean; and the OLEAN ADVERTISER newspaper is published there.

LITTLE VALLEY,

The fourth town organized in the county, was erected from Perrysburgh, April 10, 1818. In 1855 it contained 801 inhabitants, with 160 native and 18 naturalized voters; had 370 cows, from which were made 39,135 pounds of butter and 16,060 pounds of cheese; contains 19,517 acres of land, of the assessed value of \$215,482. Taxes in 1856, \$1,944.47.

POST OFFICE—*Little Valley*.

“**ROCK CITY.**”

One of the great natural wonders of the American Continent, which is yet to become a resort for thousands now ignorant of its grandeur,

is situated in the wilderness, on lot 77, in the town of Little Valley, about four miles from that Station, on the New York and Erie Railroad. Rock City is upon the top of a hill, about 400 feet above the bed of the New York and Erie Railroad, and 2,000 feet above tide water; yet so easy and regular is the grade on the Little Valley side of the hill, a good carriage road to the "city entrance" could be constructed for \$200. Visitors can now ride in carriages to within one mile of the city.

At the "city entrance" you pass down an inclined plane, about four feet wide, two rods long, and ten feet descent, into the open court, or "public square," as it is called, where is a circular flat stone, twenty feet in diameter, elevated about four feet above the ground, upon which parties usually partake lunch when visiting the city. From this point streets, lanes and alleys, in innumerable numbers and directions, wind their devious ways over an hundred acres. One who was ever in the City of Boston, starting in Dock Square, and going through its crooked streets, upon visiting "Rock City" cannot but be forcibly reminded of the *strong* resemblance between the irregular streets and huge *stone blocks* of the latter "City" and the "City of Notions."

Hall's Geology of New York says: "The blocks (of sandstone and conglomerate) are widely scattered along the margin of the hill, and as we approach the undisturbed parts of the rock, they become more numerous, and soon assume a regularity in arrangement which shows them to remain nearly in their original relative position, except that the joints are widened by the undermining of the rocks below, and partly, perhaps, by the destruction of the rock itself. The whole presents an appearance like a cliff of harder rock resting on a more destructible one below, which has been exposed to the waves of the sea or large lakes. In some places, where the blocks are otherwise closely arranged, there are large spaces where the masses have been removed or disintegrated, presenting a fancied resemblance to court-yards or squares, in the midst of the numerous streets and alleys. The whole area occupied by the rock at this place is estimated at an hundred acres. The large trees which stand upon the top of the immense blocks at this place, have often sent their roots down the sides, where they are sustained in the deep soil, supporting the huge growth above upon an almost barren rock. The masses offer fine exhibitions of the diagonal lamination and contorted seams of iron ore. The rectangular blocks (composed of pure white pebbles conglutinated) are from thirty

to thirty-five in thickness, and, standing regularly arranged along the line of outcrop, present an imposing appearance, and justify the application of the name it has received."

GREAT VALLEY,

The fifth town organized in the county, was erected from Olean, April 15, 1818. In 1855 it contained 1,198 inhabi-

tants, with 226 native and 30 naturalized voters; had 388 cows, from which were made 34,684 pounds of butter and 240 pounds of cheese; contains 33,715 acres of land, of the assessed value of \$238,561. Taxes in 1856, \$2,048.92.

POST OFFICES—*Great Valley* and *Killbuck*.

GREAT VALLEY NURSERY!!!

S. T. KELSEY & CO., Proprietors,

Keep on hand a general assortment of

Fruit and Ornamental Trees and Shrubs.

We are also extensively engaged in the cultivation of

EVERGREENS

AND

DECIDUOUS FOREST TREES,

For other Nurserymen and Planters; all of which will be sold very cheap, at

WHOLESALE OR RETAIL.

Our Wholesale Catalogues will be sent *gratis* to all applicants.

Letters, asking further information, promptly answered.

Post Office address,

S. T. KELSEY & CO.,

Great Valley, N. Y.

NOTE.—Mr. Kelsey exhibited a fine assortment of EVERGREENS at the Cattaraugus Co. Fair, 1857, which attracted much attention from visitors, and were highly commended by the judges. To people residing in this and adjoining counties, we cannot too strongly urge the merits of trees from this nursery over any foreign ones. The fact that *thousands of dead trees have been imposed upon the citizens of this County*, from the latter nurseries, forcibly suggests “buy your trees *alive*, and of honorable dealers!”

ELLCOTTVILLE,

(THE COUNTY SEAT,)

The sixth town organized in the county, was erected from Franklinville, April 13, 1820. In 1855 it contained 1,838

inhabitants, with 275 native and 73 naturalized voters; had 601 cows, from which were made 43,155 pounds of butter and 22,555 pounds of cheese; contains 30,459 acres of land, of the assessed value of \$383,900. Taxes in 1856, \$2,783.03. Three newspapers—the “Cattaraugus Republican,” the “Cattaraugus Freeman,” and the “American Union”—are published in this town.

POST OFFICES—*Ellicottville* and *Plato*.

STOVES OF ALL KINDS.

During a recent visit to the farm of MESSRS. STAUNTON & JOHNSON, of Ellicottville, we were particularly pleased with what we consider one of the most important enterprises, and which we have no hesitation in saying, in its results, will prove of decided public benefit to the farming interests of Cattaraugus County, was the fine young herd of thorough-bred Devon Cattle.

We understand it is the intention of MESSRS. STAUNTON & JOHNSON to continue breeding this beautiful stock of Cattle, that are so well adapted to the hills of Cattaraugus, which will afford our farmers the most favorable opportunity of improving their herds. The following are the pedigrees of a part of their herd. The *numbers* are from "Davy's Devon Herd Book." When not mentioned otherwise, the animals were bred by Messrs. S. & J. Animals with a * will appear in the next volume of the *Devon Herd Book*.

BULLS.

DON CARLOS (346); calved in July, 1853, bred by Lewis F. Allen, Esq., Black Rock, N. Y. Sire, Quartley (284); grandsire, Albert (2); dam, Sappho 2d (1137), by Rover (353); grandam, Sappho 1st, by Eclipse (191); g. g. dam by Mr. Patterson's Anchisis (140); g. g. g. dam by Bolivar, bred by Mr. Thompson, of Baltimore, by imported Garriek; g. g. g. g. dam, Susan, by Denny, imported from Mr. Denny, of Norfolk, England; g. g. g. g. g. dam sent by Earl of Leicester to Mr. Patterson, in 1817. He gained the first prize (\$8) at the Cattaraugus County Fair, 1857.

*MACDUFF (No. —); extracted by the *Cesarian* operation, October 23, 1856. Sire, Don Carlos (346); g. sire, Quartley (284); dam, Strawberry (1061); g. dam, Strawberry, by Bloomfield (148); g. g. dam, Strawberry, by Exchange (197).

NOTE.—The mother (Strawberry, 1061.) of Macduff was found on the morning of October 23, 1856, with her thigh bones broken, and bleeding from the

wound quite freely; she was then advanced to within three weeks of her time. So soon as her condition was ascertained, a skillful surgeon, and an equally skillful butcher, were procured; chloroform was administered to the cow, and in a few minutes, by the Cæsarian process, MACDUFF came into being—healthy, erect, handsome! and at the recent County Fair received the second prize in the Class of Devon Bull Calves; though it is but just to state that he was not in good condition, in consequence of sickness through the summer. His name, doubtless, was suggested from

"MACBETH.—I bear a charmed life, which must not yield
To one of woman born."

“MACDUFF — Despair thy charm;
And let the angel, whom thou still has serv'd,
Tell thee Macduff was from his mother's womb
Untimely ripp'd!”

***LESLIE** (No. —); calved March 20, 1857. Sire, Megunticook (251); g. sire, Prince Albert (102); g. g. sire, Hundred Guinea (56); dam, Lady Lightfoot (824); g. dam, Lady Bird (820*b*).

COWS AND HEIFERS.

NONPAREIL (925); calved April, 1849, (bred by Mr. R. Merson, of Brinsworthy, Devonshire, England.) Sire, Sultan (122); g. sire, Northampton (86); dam, Nonpareil, by Young Sillifant (121). She gained the first prize at the New York State Fair, 1851, and a silver medal at the Fair, 1856, and the second prize at the Cattaraugus Co. Fair, 1857—Lady Lightfoot (824) taking the first prize.

LADY LIGHTFOOT (824); calved December 20, 1850, (bred by Mr. R. H. Van Rensselaer, of Morris, Otsego Co., N. Y.) Sire, Duke of York (37); g. sire, Quartley's Prince of Wales (105); dam, Lady Bird (820*b*), by Venture; g. dam, Lady, by Hundred Guinea (56). She gained the first prize at the New York State Fairs—in 1851 as a calf; in 1852 as a yearling; and in 1856 as the best cow, 3 years and upwards; and the first prize (\$7) at the Cattaraugus County Fair, 1857.

*NORNA (No. —); calved April 9, 1857. Sire, Megunticook (251); dam, Nonpareil (925). She gained the first prize at the Cattaraugus County Fair, 1857, as a calf.

YORKSHIRE.

The seventh town organized in the county, was erected from Franklinville, April 13, 1820. In 1855 it contained 1,728 inhabitants, with 385 native and 16 naturalized voters; had 948

cows, from which were made 86,025 pounds of butter and 12,804 pounds of cheese; contains 23,589 acres of land, of the assessed value of \$309,767. In 1857, 66,638 pounds of maple sugar were made in this town.

SOUTH VALLEY,

The twenty-ninth town organized in the county, was erected from Randolph and Cold Spring, April 2, 1847. In 1855 it contained 586 inhabitants, with 122 native and 6 naturalized voters; had 168 cows, from which were made 16,010 pounds of butter; contains 37,749 acres of land, of the assessed value of \$164,607. Taxes in 1856, \$1,048.93.

POST OFFICE—*Onoville*.

BUCKTOOTH,

The thirtieth town organized in the county, was erected from Little Valley, November 29, 1854. In 1855 it contained 453 inhabitants, with 89 native and 5 naturalized voters; had 94 cows, from which were made 9,975 pounds of butter and 1,006 pounds of cheese; contains 47,620 acres of land, of the assessed value of \$205,469. Taxes in 1856, \$1,554.29. Maple sugar made in 1857, 2,690 pounds.

The BUCKTOOTH HOUSE, kept by the veteran JOHN BOARDMAN, Esquire, we can truthfully commend as one of the best conducted hotels in Western New York.

POST OFFICE—*Bucktooth*.

EAST OTTO,

The thirty-first town organized in the county, was erected from Otto, November 30, 1854. In 1855 it contained 1,228 inhabitants, with 262 native and 9 naturalized voters; had 1,445 cows, from which were made 86,244 pounds of butter and 265,900 pounds of cheese; contains 23,091 acres of land, of the assessed value of \$269,549. Taxes in 1856, \$1,565.26.

POST OFFICE—*East Otto*.

INDIAN RESERVATIONS.

The ALLEGANY RESERVATION occupies a tract averaging a mile in width on either side of the Allegany River. It begins in the town of Allegany, and continues through the towns of Carrolton, Great Valley, Bucktooth, Cold Spring and South Valley, to the State line. The Indians are remnants of the Six Nations. Population in 1855, 754.

The CATTARAUGUS RESERVATION lies in Persia and Perrysburgh, and in Erie County. The population in 1855 was 1,179.

THE ALLEGANY RIVER

Affords the great natural highway for conveying lumber to the Southern and Western markets, from Cattaraugus and the adjoining regions of Pennsylvania. It passes through Portville, Olean, Allegany, Carrolton, Great Valley, Bucktooth, Cold Spring and South Valley.

THE GENESEE VALLEY CANAL

Is now completed from Rochester to Olean, passing through Hinsdale and Olean in this county. Its importance is fully noticed in the sketch of Judge MARTIN.

THE NEW YORK AND ERIE RAILROAD.

This great highway, which has raised the value of real estate in this county, since its completion, fully one hundred per cent., and brought a cash market to the farmers' doors, passes through the towns of Hinsdale, Olean, Allegany, Carrolton, Great Valley, Bucktooth, Little Valley, Mansfield, New Albion, Persia, Dayton and Perrysburgh.

.

Manny's Patent Reaping & Mowing Machine.

Over 30,000 of these Machines have been made, and used with the most perfect success.

Every Machine is Warranted:

A. PATCHEN, Manufacturer,
Westfield, Chautauque Co., N. Y.

MANNY'S PATENT

Mowing and Reaping Machines,

MANUFACTURED BY

A. PATCHEN,

Westfield, N. Y.

These justly celebrated Machines will be greatly improved for the harvest of 1858, and such additions and alterations made as have been suggested during the past season.

These Machines for *ease of draught, quality of work, true and perfect adjustability*, are not equalled by any others now in use.

An improved double lever at the driver's seat enables him to raise or lower the cutters at will, by which means he can cut high or low, pass over sticks or stones, or over the cut grass, from field to field, without leaving his seat. I manufacture two sizes of the above Machines.

No. 1 cuts five feet wide, is strongly built, and adapted to level land.

No. 2 cuts four feet four inches, is light and peculiarly adapted to hilly and uneven land. Either size is sold with or without Reaper attachment.

I shall also, the coming season, manufacture a light

IRON MOWER,

with *cast steel cutter bar*. This Machine will be the most *simple* and *perfect* SINGLE MOWER ever offered to the Farmer.

Wait, and get the Best!

Worcester's Royal Quarto Dictionary.

We have the pleasure to inform the Public that we have commenced electrotyping Dr. WORCESTER'S ROYAL QUARTO DICTIONARY, and hope to complete it during the present year. The Work will contain about sixteen hundred pages, and will be

BEAUTIFULLY ILLUSTRATED.

will contain, in its various vocabularies, upwards of *Ten Thousand Words more* *an can be found in any other Dictionary of the English Language.* It is, therefore, very important to

WAIT, AND GET THE BEST.

WORCESTER'S SERIES OF DICTIONARIES

NOW CONSIST OF

- I. Worcester's Universal and Critical Dictionary.
 - II. Worcester's Academic Dictionary.
 - III. Worcester's Comprehensive Dictionary.
 - IV. Worcester's Elementary Dictionary.
 - V. Worcester's Primary Dictionary.
-

To show in what estimation these books are held, it will be proper to state that they have recently been introduced into the Public Schools of BOSTON, CAMBRIDGE, NEW YORK, BALTIMORE, WASHINGTON (D. C.), NEW ORLEANS, ST. LOUIS, CHICAGO, BUFFALO, ROCHESTER, and many other places in which the Schools are in the highest state of excellence. In addition to this testimony, recent letters of commendation have been received from MESSRS. EVERETT, PRESCOTT, IRVING, BANCROFT, and other eminent writers, whose practice is known to be in conformity with their expressed opinions. Hon. EDWARD EVERETT says: "I have made constant use of Mr. Worcester's Dictionaries since their first publication. His orthography and pronunciation represent, as far as I am aware, the most approved usage of our language. *His definitions seldom have anything to desire.*" Hon. HORACE MANN says: "In all my writing, speaking, and teaching, I have endeavored to conform to the rules for orthography and pronunciation as contained in Worcester's Dictionary." Hon. CHARLES SUMNER says: "The Universal Dictionary *I have used almost constantly, and almost daily,* since its publication. I have no hesitation in calling it *the best* practical Dictionary in the English language." Other gentlemen use language to the same effect; and it may be seen by their writings that they design to conform to the most approved usage, which Dr. Worcester recognizes as the standard authority, and of which his dictionary purports to be the exponent. The innovations, however plausible, invented by one man, ought not and cannot prevail against the common usage of the best writers of the English language; nor can there be any true American standard of authority other than the usage of the best American writers.

HICKLING, SWAN & BREWER,

SCHOOL BOOK DEPOSITORY,

No. 131 Washington Street, Boston.

And for Sale by Booksellers generally, throughout the United States.

THE GREAT AMERICAN COUGH REMEDY.

SEWARD'S COUGH CURE.

WARRANTED A SAFE, CERTAIN, AND SPEEDY CURE FOR

**Colds, Coughs, Whooping Cough, Croup,
Influenza, Incipient Consumption,**

AND ALL DISEASES OF THE THROAT AND LUNGS.

The COUGH CURE is not what is usually termed a quack medicine, but is prepared on strictly scientific principles, and by skillful hands. It was first prepared in small quantities, to give it a sufficient trial, after which it passed through the hands of some of the most eminent Physicians in the State, and was pronounced by all to be the most valuable and useful Cough Medicine ever brought before the public.

The evidence is such that its great efficacy is placed beyond a doubt. A deep sensation is being created, and the number who use it is constantly increasing. Some have been taken from death's door,—many have regained health of body and mind—and many more are on the road to it. We have received valuable recommendations from gentlemen of influence all over the country, in whose families cures have been and are still being effected; and when we say that no discovery in the healing art, which has been made in the present century, has created so great popularity and confidence in so short a time, we state what is positively true. Such being our convictions, we shall send it forth on its mission of mercy, that all who are suffering from disease of the throat and lungs may have it in their power to be benefited.

To the afflicted we would say, try it—it can do no harm, and will cure you of that dreadful hacking cough, which carries so many to a premature grave.

Price, 50 Cents per Bottle.

Prepared by

S. B. SEWARD,

DRUGGIST AND APOTHECARY,

ELLCOTTVILLE, N. Y.,

And sold by Druggists generally through the country.
